Disclaimer

This manual contains information on the operation and maintenance of the ZKTeco product. The copyright in all the documents, drawings, etc. in relation to the ZKTeco supplied product vests in and is the property of ZKTeco. The contents hereof should not be used or shared by the receiver with any third party without express written permission of ZKTeco.

The contents of this manual must be read as a whole before starting the operation and maintenance of the supplied product. If any of the content(s) of the manual seems unclear or incomplete, please contact ZKTeco before starting the operation and maintenance of the said product.

It is an essential pre-requisite for the satisfactory operation and maintenance that the operating and maintenance personnel are fully familiar with the design and that the said personnel have received thorough training in operating and maintaining the machine/unit/product. It is further essential for the safe operation of the machine/unit/product that personnel have read, understood, and followed the safety instructions contained in the manual.

In case of any conflict between terms and conditions of this manual and the contract specifications, drawings, instruction sheets or any other contract-related documents, the contract conditions/documents shall prevail. The contract specific conditions/documents shall apply in priority.

ZKTeco offers no warranty, guarantee or representation regarding the completeness of any information contained in this manual or any of the amendments made thereto. ZKTeco does not extend the warranty of any kind, including, without limitation, any warranty of design, merchantability, or fitness for a particular purpose.

ZKTeco does not assume responsibility for any errors or omissions in the information or documents which are referenced by or linked to this manual. The entire risk as to the results and performance obtained from using the information is assumed by the user.

ZKTeco in no event shall be liable to the user or any third party for any incidental, consequential, indirect, special, or exemplary damages, including, without limitation, loss of business, loss of profits, business interruption, loss of business information or any pecuniary loss, arising out of, in connection with, or relating to the use of the information contained in or referenced by this manual, even if ZKTeco has, of the possibility of such damages.

This manual and the information contained therein may include technical, other inaccuracies or typographical errors. ZKTeco periodically changes the information herein which will be incorporated into new additions/amendments to the manual. ZKTeco reserves the right to add, delete, amend, or modify the information contained in the manual from time to time in the form of circulars, letters, notes, etc. for better operation and safety of the machine/unit/product. The said additions or amendments are meant for improvement /better operations of the machine/unit/product and such amendments shall not give any right to claim any compensation or damages under any circumstances.

ZKTeco shall in no way be responsible (i) in case the machine/unit/product malfunctions due to any non-compliance of the instructions contained in this manual (ii) in case of operation of the machine/unit/product beyond the rate limits (iii) in case of operation of the machine and product in conditions different from the prescribed conditions of the manual.

The product will be updated from time to time without prior notice. The latest operation procedures and relevant documents are available on <u>http://www.zkteco.com</u>.

If there is any issue related to the product, please contact us.

About the Company

ZKTeco is one of the world's largest manufacturer of RFID and Biometric (Fingerprint, Facial, Finger-vein) readers. Product offerings include Access Control readers and panels, Near & Far-range Facial Recognition Cameras, Elevator/floor access controllers, Turnstiles, License Plate Recognition (LPR) gate controllers and Consumer products including battery-operated fingerprint and face-reader Door Locks. Our security solutions are multi-lingual and localized in over 18 different languages. At the ZKTeco state-of-the-art 700,000 square foot ISO9001-certified manufacturing facility, we control manufacturing, product design, component assembly, and logistics/shipping, all under one roof.

The founders of ZKTeco have been determined for independent research and development of biometric verification procedures and the productization of biometric verification SDK, which was initially widely applied in PC security and identity authentication fields. With the continuous enhancement of the development and plenty of market applications, the team has gradually constructed an identity authentication ecosystem and smart security ecosystem, which are based on biometric verification techniques. With years of experience in the industrialization of biometric verifications, ZKTeco was officially established in 2007 and now has been one of the globally leading enterprises in the biometric verification industry owning various patents and being selected as the National High-tech Enterprise for 6 consecutive years. Its products are protected by intellectual property rights.

About the Manual

This manual introduces the operations of **ZKBio Time** software.

All figures displayed are for illustration purposes only. Figures in this manual may not be exactly consistent with the actual products.

Document Conventions

Conventions used in this manual are listed below:

GUI Conventions

	For Software
Convention	Description
Bold font	Used to identify software interface names e.g., OK, Confirm, Cancel.
>	Multi-level menus are separated by these brackets. For example, File > Create > Folder.
	For Device
Convention	Description
<>	Button or key names for devices. For example, press <ok< b="">>.</ok<>
[]	Window names, menu items, data table, and field names are inside square
	brackets. For example, pop up the [New User] window.

Symbols

Convention	Description
	This represents a note that needs to pay more attention to.
Ÿ	The general information which helps in performing the operations faster.
*	The information which is significant.
۷	Care taken to avoid danger or mistakes.
	The statement or event that warns of something or that serves as a cautionary example.

1 Introduction

ZKBio Time provides unified management to customers in terms of time management and operational safety. It helps the customers to continuously improve safety management by affording a simple and efficient platform that can manage all the time and security-related aspects at a single instance.

Features

- With a powerful data handling capacity, the system can manage the attendance data of 10,000 employees.
- The visual and reliable operating procedure gives you years of attendance management experience.
- Automatic user management makes the system simpler and more efficient.
- The hierarchical management ensures user data security.
- The real-time data processing system ensures data availability to the administrators at any time.

Requirements of Server Hardware Configuration

CPU: Frequency of more than 2.0 GHz.

Memory: 4 GB available or above.

Hard Disk: Available space of 100 GB and above. It is recommended to use an NTFS hard disk partition as the software installation directory. (An NTFS hard disk partition provides better performance and higher security).

Software Operating Environment

Supported Operating System: (64-bits) Windows 7/8/8.1/10, Windows Server 2008/2008 R2/2012/2012 R2/2016/2019.

Supported Database: PostgreSQL (Default), MSSQL Server 2005/2008/2012/2014/2016/2017/2019, MySQL 5.0/ 5.6/ 5.7, Oracle 10g/ 11g/ 12c/19c.

Supported Mainstream Browser: IE 11+, Google Chrome 33+, Firefox 27+.

1.1 ZKBio Time Modules

The software mainly consists of the following functional modules:

Personnel module

The personnel module includes four parts: Department Management to set the Company's main architecture; Employee Management to enter employee's information into the system, allocating employees to various Departments and to maintain employee details; Workflow Management to create a systematic structure with multi-level management; Configurations to add document details to each employee.

Device Module

The Device module sets the communication parameters to connect the devices. The communication with the devices will be successful only after the communication parameters are set properly. Once the communication is successful, you can view information about connected devices and perform operations such as remote monitoring, upload, and download.

Attendance Module

The Attendance module collects and processes attendance data of all the employees, manages their work schedules, leaves, requests, and generates all transactions and schedule reports.

Access Control Module

The Access Control module sets Time period, Holidays, Access Groups, Unlock combinations, etc. Also, it manages the access control parameters such as Door Lock Delay, Door Sensor, Anti-Passback, Duress options, etc.

Payroll Module

The Payroll module helps to calculate the salary of each employee by considering the allowances, deduction, expenses, loan, and salary advance. Payroll formulas can be assigned so that salary can be incremented/deducted based on the variables.

Visitor Module (Optional)

Visitor Module is integrated with Access Control Module to provide a way to easily control, record and track visitors. It implements entry registration, exit registration, visitor reservation and so on.

Meeting Module

Simple meeting management helps users to manage meeting devices, meeting rooms, meeting applications, meeting attenders and attendance of attenders.

MTD Module

The MTD Module obtains verification records from the mask & body temperature detection devices and generates statistics and reports about mask and body temperature. If there is any personnel who has higher body temperature or does not wear a mask, an email notification will be sent to the personnel himself, the system superuser and system user who has permission to access the department which the personnel belongs to. And also, if the personnel's APP status is enabled, the software will also push notification to corresponding personnel APP account.

System Module

The System Module assigns System Users and configures their roles. It sets the system parameters and manages the system operation logs.

1.2 Fundamental Procedure

- Follow the below procedure for a smoother interface experience. It takes Superuser as an example. Different users have different access rights, so the procedure changes for each role.
- Log in to the system and modify the default password of your account.
- Assign user accounts and roles for the users using the system (such as Company Management Personnel, Registrars, and Attendance Administrators).
- Set the common System information such as System parameters, Announcements, and Alerts.
- Set the organization architecture according to the company's structure and set the corresponding position details.
- Enter the employee information.
- Set the regional structure of the company. Add T&A devices for the system and configure the devices.
- Set the attendance parameters. You can use the default settings or modify the settings as per your company's regulations.
- Set the attendance timetables to predefine the working hours and related parameters.
- Set the shifts for employees.
- Schedule the shifts and assign employees to the shifts. Assign temporary schedules if there is any requirement.
- Set Leave, Holiday, Compensatory Leave based on the attendance parameters.
- Set time period, access group, unlock combination and so on for each area for lock control.
- Set the payroll formula for overtime, leave, exception and so on. Set the payroll structure for the personnel.
- Manage the use of meeting room and the access of visitors.
- Generate the attendance report, payroll report and meeting attendance report. The system collects statistics and generates reports for the specified period.

2 System Management

2.1 Login

- 1. Once the program is installed on the system, double-click the program icon on the desktop to view the system login interface. Other systems can access the application through the network.
- 2. Open the browser, enter the Server IP Address and the Port number in the address bar. Click **Enter** to login.

7ZKBio Time

Admin Login Self-Service	Login Self-Service
Username	ime .
Password	ord
Remember Me	
P Login	Login Fingerprint
71.	7/7

To use the system on a server, select **Program > ZKBio Time > ZKBio Time Server Controller** and start the service.

Then, double-click the shortcut icon of ZKBio Time Home Page on the desktop. The system login interface pops up.

∕≪Note:

In Windows 7/Vista, right-click **ZKBio Time Server Controller** and select **Run as administrator** from the **shortcut** menu.

3. When you log in to the system, authentication is required to guarantee the system security. A superuser account (with all operational permissions) need to be created for a user who is using

the system for the first time.

- 6. Click on ______, the users can log in into the system with the same browser without entering the password.
- 7. Enter the Username and Password. Click Login to view the user interface.
- 8. After the user logs in, the system displays the dashboard as shown in the below figure.

The dashboard facilitates users to check the employee's attendance statistic, device status, attendance records, department monthly work hours/overtime hours, and the to do list in real-time.

There are two methods to calculate the employee's attendance statistics. One is to check the attendance record of the employee and the other is based on the attendance calculation result

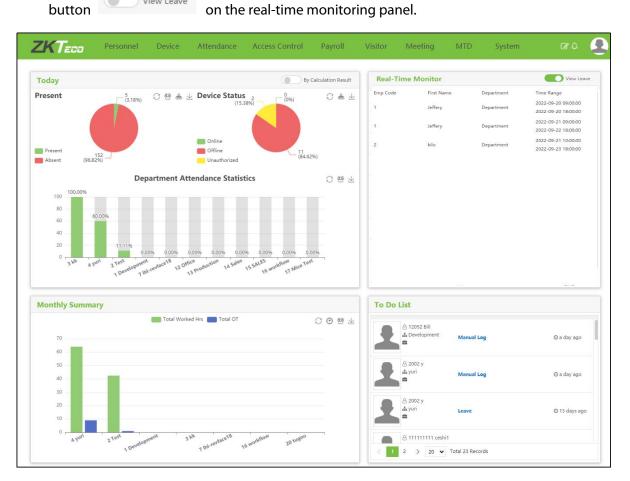

which is according to the attendance rule. Users can click dashboard to switch the calculation method.

Users can filter the data by corresponding icons on the dashboard, such as department $\,^{ ext{eq}}$, area

🙈, time period 🕑.

View Leave

The user can view the employees who will request for leave and are on leave by clicking the

Users can see nine modules namely Personnel, Device, Attendance, Access Control, Payroll, Visitor, Meeting, MTD and System. Click the related module to perform the related functionalities.

2.2 Logout

Click the **User button** on top-right of the interface, select Logout and click **Confirm** to log out from the application.

After logging out, stop the service in ZKBio Time Server Controller and quit the service counter.

2.3 Controller

Click the **User button** on top-right of the interface, select **Controller**, as shown in the figure below.

3 Personnel Management

The Personnel management module allows you to set the main architecture of the company. It includes adding employees to the system, allocating employees to departments maintaining the employees and so on.

3.1 Department Management

Select **[Personnel] > [Department]** to view the Department management interface, as shown in the figure below.

🏷 Q 🗉	Department										
Organization	Bookmarks +	T Filters -									
	Add Delete	Import	Personnel Transfer			1 2	9 []	~	÷	00

Before adding the employees, set the organizational structure of the company. When the module is used for the first time, a level 1 department with department name as "Department" and Department Code as "1" will be created as a default.

*∝*Note:

This Department can be edited (modified) but cannot be deleted.

3.1.1 Add a Department

1. Select [Personnel] > [Department] > [Add] to add a new Department, as shown in the figure below.

Department Code*	3	
Department code		
Department Name*		
Superior		w
Department Manager		-
Department Manager		

Set the parameters as shown below:

Department Code: Enter a unique Department code maximum of 50 digits.

Department Name: Enter the corresponding Department Name maximum of 100 characters.

Superior: Click 🗖 and select a superior Department of this Department from the drop-down list.

Department Manager: Select the manager of the department. When the employee of the department is not set with workflow, department manager will review all applications.

⊯Note:

- Please refer to <u>3.6 Workflow</u> for detailed steps of setting workflow.
- 2. After entering the required details, click **[Confirm]** to save the new Department. Click **v** to refresh the Department tree.

⊯KNote:

- You can click [Import] to import the Department information to another software or system. For detailed operation, please refer to <u>5."Import"</u> in Appendix 1.
- You can click to export the Department data locally. For detailed operation, please refer to <u>6."Export"</u> in Appendix 1.

3.1.2 Edit a Department

If you want to change the organization's structure, you can modify the Department Name, Department Code, and the Superior Department. Click the **Department Code** of the Department to

be modified or, click in the same row of the Department to be modified. After modifications, click **[Confirm]** to save the modified Department information.

3.1.3 Delete a Department

Select the Department to be deleted and click [Delete] on the upper left of the Department list.

Or directly click ¹ in the same row of the Department to be deleted. Click **[Confirm]** to delete the Department.

∕∕≤Note:

Deleting or modifying a Department causes the employees belonging to the particular Department is going to belong to none of the Departments. This also leads to the failure of generating some reports.

If deletion or modification is indeed required, transfer the personnel from the particular Department to other Departments, and then delete the Department. That is, the Department which is currently being used cannot be deleted.

3.1.4 Personnel Transfer

You can adjust employees to the selected Department in batches.

1. Select [Personnel] > [Department]. Select the corresponding Department and click [Personnel Transfer].

De	partme 👻	Department	~ Q	Employee	Selected 0

1. Profile

Set the parameters as shown below:

Employee ID: Enter the Employee ID maximum of 20 digits. Digital ID increments based on the maximum value in the system.

First Name: Enter the Employee's first name.

Last Name: Enter the Employee's last name.

Department: Select the Employee's Department from the drop-down list. (If no Department has been set, only the default Department existing in the system can be chosen)

Position: Select the position from the drop-down list.

Area: Select an area from the drop-down list. (If no area has been set, only the default area existing in the system can be chosen).

Employment Type: Select the employment type from the drop-down list. It can be set as **Official**, **Temporary** and **Probation**. If **Temporary** or **Probation** is selected, then users can set the valid period for the personnel.

Employment Type	Temporary	*	Hired Date	2021-12-17	
Effective Start Date*	2021-12-17		Effective End Date*	2021-12-17	

After the valid period, the personnel will be deleted from corresponding device(s).

Hired Date: It is set to the current date by default. The employment date is considered as the starting date of attendance calculation. The employee's attendance before this date is not

calculated in the statistical result.

Superior: By default, the Department Manager is the employee's superior. In the drop-down box, you can choose another person to be the employee's superior. If the employee is not set with the workflow, all applications will be approved by the superior.

Workflow Role: Set the role of employee in Workflow.

Employee Photo: Click **[Photo]** and select the photo to be uploaded. After selection, the photo is displayed, as shown in the figure below.

Click [OK] to save the profile details.

∕∕⊗Note:

While HTTPS is enabling, users can access the system with https address and enroll personnel photo with USB camera or the camera comes with the computer.

3. Device Access Setting

Click [Device Access Setting] to add the device details.

ivate Informatio	n	Device Acce	ss Settings	Attendance Settings	App	Settings	Payroll Settings	Leave Group
Verify Mode	Any	C.	v	Device Privilege	Empl	oyee	Ŧ	
Card NO.				PIN				
Enroll Device				FP Qty.	v10	0	Enroll	
Palm Qty.	v8		Enroll	Face Qty.	v12	0	Enroll	

Verify Mode: Select the verification mode when the employee punches for attendance. **Device Privilege:** Select the privilege of a user in the device from the following options.

These four device privileges are the default device privileges. Some devices only display "Employee" and "Super Administrator".

Once the personnel device privilege is set as "Registrar", "System Administrator" or "Super Administrator", all the persons corresponding to the devices in that area, and the personnel with "Employee" privilege can only make verification on the device and cannot enter and operate the device menu.

Only "Registrar", "System Administrator" or "Super Administrator" can enter the device and operate the corresponding device menu.

Card NO.: Enter the card number manually, assign card numbers to employees to verify attendance.

PIN: Set the employee's password. The black-and-white T&A devices support a password maximum of 5 digits. The color-screen T&A devices support passwords of 8 digits. Password digits exceeding the specified length are cut out by the system automatically. When you change the password, clear the old password in the text box and enter the new password.

Enroll Device: Enroll the employee in the T&A device.

FP Qty.: Click [Enroll] to register the employee's fingerprints with a fingerprint scanner.

Palm Qty.: Click [Enroll] to register the employee's palm with a palm scanner (e.g., PV10R).

Face Qty.: Click [Enroll] to register the employee's face with a face scanner (e.g., FA10R).

Bio-Photo: Upload the bio photo of the employee.

4. Attendance Settings

Click [Attendance Setting] to set the attendance parameters.

Private Information	Device Access Settings	Attendance Settings	App Settings	Payroll Settings	Leave Group	
Self-Password		Attendance Group		*	IP Address	
Enable (Attendance	Yes	Enable Schedule	Yes		Enable Holiday Yes	
Enable Overtime	Yes	Enable Compensatory	No No			

Self-Password: Enter employee's login password.

Attendance Group: Select employee's attendance group.

IP Address: Record the host IP of employees, which is used to check the IP when employees punch in on the web page.

Enable Attendance: It is enabled by default. If it is disable, the employee's attendance details are not included in the result of attendance statistics. (For some exceptions and temporary employees, it can be set to No)

Enable Schedule: It is enabled by default. If it is disable, then the system will not calculate the personnel's attendance, even if these personnel has been assigned a time schedule in Attendance Module.

Enable Holiday: It decides whether to enable the holiday function or not. The default value is Yes. If it is set to No, the employee's attendance will not be calculated on holiday.

Enable Overtime: It is enabled by default. If it is disable, then the system will not calculate this personnel's overtime, even if the overtime rule has been set in Attendance Module.

Attendance Group: Set the employee's attendance group.

- 5. Document (This option is only available in the edit mode, but not in the add mode)
- Set the parameters of the certificate expiration reminder.

Private Information	Device Access Settings	Attendance Settings	Document	App Settings	Payroll Settings	Leave Group	
Add							
Document	Cert No.	Expire Date		Email Alert		Alert Before	
Birth Certificate	235325123253	2021-12-17	6	No		0	🖭 🕜 🏛

Click [Add]. A window to add a new certificate will appear as shown in the below image:

Document*		-	Cert No.		Expire Date*	2021-12-17	
_				-			
Email Alert	NO		Alert Before*	0			
Document	Choose File No fi	le chosen					

Document: Select the type of document.

Cert No.: Enter the No. Of the document.

Expire Date: Enter the expiration date of the document. An email alert will be sent before the

expiry date.

Email Alert: Select whether to send an alert via email or not.

Alert Before: Set the number of days to alert before the document expires.

Document: Click [Choose File] and select the document photo to be uploaded.

Click [Confirm] after entering the required details.

Users can click 💷 on the document list to download and check the document photo.

Add					
Document	Cert No.	Expire Date	Email Alert	Alert Before	
ID Card	45678901234	2021-05-31	No	1	E 2 🛍

*∝*Note:

Consider the following example which describes the alerting system for document expiration.

- 1. The expiry date of the document is set as follows:
 - a) Expiry date: 2020-01-20
 - b) Alert before 2 days
 - c) Needs an email alert.
- 2. An email alert will be sent to the employee on 202-01-18 at 00:00 in the morning regarding the expiry of the document.
- 3. If the expiry date of the document is not modified in the system, the person will receive an email reminder every day at 00:00 after the date 2020-01-18.

To edit the existing reminder, click *of* the corresponding column of the reminder.

• To delete the certificate expiration reminder, click 🔟 in the same row of the reminder.

Prompt		×
Are you sure to delete	the selected	document?
	Confirm	Cancel

Click [Confirm] to delete the certificate.

6. App Settings

Click [App Settings] to set the App settings.

• After modifications, click **Confirm** to save the modified details.

3.4.3 Delete an Employee

Select the employee(s) and click [Delete] on the upper left of the employee's list or click in the same row of the employee to be deleted.

Click [Confirm] to delete the employee.

⊯Note:

When you delete an employee, the information of the employee in the database is also deleted.

3.4.4 Personnel Transfer

1. Personnel Transfer

This includes Department Transfer, Position Transfer, Area Transfer and Pass Probation.

• In the employee's list select the employee(s) and click [Personnel Transfer] > [Department

Transfer] to adjust the department.

Department T		
Department*:	 *	
Rem <mark>ar</mark> ks:		
	11	
	//	
	Confirm	Cancel

- In the Department drop-down list, select the Department to which the employee is to be moved and enter the remarks.
- Click [Confirm] to save the details.

⊯×Note:

The operation of Adjust Position, Adjust Area and Pass probation are the same as the operation of Department adjustment.

2. Pass Probation

• Select the employee who is qualified to pass probation and click [Personnel Transfer] > [Pass Probation].

• Click [Confirm] to complete the operation.

3. Personnel Resignation

Personnel resignation includes resignation and disabling attendance.

• In the employee's list, select the employee (s), and click [Personnel Transfer] > [Resignation] to add the resignation details.

Resignation Date*:	2019-08-14		
Resignation Type*:	Quit	~	
Attendance*:	Enable	~	
Reason:			
		al	

Enter the details as shown below:

Resignation Date: Select the date of resigning.

Resignation Type: Select the resignation type. The types are Suspension, Dismissal, Resignation, Transfer and Unpaid retention.

Attendance: Enable if the attendance needs to be closed for the employee (The Employee details will be deleted from the attendance device as well)

Reason: Enter the reason for resignation.

• Click [Confirm] to save the resignation details.

3.4.5 App Enable/Disable Settings

1. In the employee's list, select the employee(s) and click **[App]** > **[Enable/Disable]** to enable the Mobile App.

Prompt		×
Are you sure to e items	nable mobile appli	cation 1
	Confirm	Cancel

2. Click [Confirm] to enable the user's access to the Mobile App.

3.4.6 Re-synchronize to Device

It synchronizes the employee details on the software to the devices in the corresponding area.

1. In the employee's list, select the employee(s) and click [More] > [Re-synchronize to Device] to synchronize the data.

Prompt		×
Are you sure to resy device?	nchronize user d	ata to
	Confirm	Cancel

2. Click [Confirm], to synchronize the employee data to the device.

3.4.7 Re-upload from Device

It re-uploads the employee's details from the device to the software.

1. In the employee's list, select the employee(s) and click [More] > [Re-upload from Device] to re-upload the employee details from the specified devices.

Device*	All
Serial Number	All
	Specified
	.i

2. Click [Confirm] to re-upload the employee details from the device to the software.

3.4.8 Delete the Biometric Template

In the employee's list, select the employee(s) and click [More] > [Delete the Biometric Template] to delete the biometric templates.

Delete the Biometric Template	×
Fingerprint No	Face No
Finger Vein No	Palm No
Bio-Photo No	
	Confirm Cancel

Select the type of biometric template and click **[Confirm].** The biometric template of the employee will be deleted from the device.

3.5 Personnel Resignation

3.5.1 Add a Resignation

• Select [Personnel] > [Employee] > [Resign] > [Add] to add the employee's resignation details.

De	partme 📼	Department	~ (C Employee		Selec	cted 0						
	Employee ID	First Name	Last Name	Department			Employee I	D \$	First Name	\$	Last Name 👙	Department	
	1	Mike		Test						NE	ne

Resi	gnation Date*	2021-07-01											
lesi	gnation Type*	Quit	~	Attendance*	Enable		v						
sigr	nation Reason												
				*									

Enter the details as shown below:

Employee: Select the employee to enter the resignation details. (You can filter the employees by

Department, Name or Employee ID).

Resignation Date: Select the date of resignation.

Resignation Type: Select the type of resignation. The types are Quit, Dismissed, Resign, Transfer, Retain Job Without Salary.

Resignation Reason: Enter the reason for resignation.

Attendance: Enable if attendance needs to be closed. (if it is enabled, the employee details will be deleted from the attendance device as well)

• After entering the details, click [Confirm] to save the details.

3.5.2 Delete Resignation

Select the employee(s) to be deleted and click [Delete] on the upper left of the personnel list or click

🔟 in the same row of the employee to be deleted.

Prompt		×
Are you sure to de	lete the select	ed 1 items?
	Confirm	Cancel

Click [Confirm] to delete the resignation details.

3.5.3 Reinstate

It restores a resigned employee from the resigned employee's list. The details of the employee will be deleted from the resigned employee's list.

1. In the resigned employee's list, select the employee whom you want to restore from resignation. Click [Reinstate] to restore the employee.

Prompt	×
Are you sure to reinstater	nent 1 items?

2. Click [Confirm] to reinstate the resigned employee.

3.5.4 Disable Attendance

To disable the attendance for a resigned employee, perform the following steps:

1. Select the resigned employee whose attendance needs to be disabled. Click [Disable Attendance].

Prompt		×
Are you sure to d items	isable attendance f	function 1

2. Click [Confirm] to disable the attendance of the selected employee.

⊯Note:

- You can click [Import] to import the employee's resignation details in another software or system. For detailed operation, please refer to <u>5."Import"</u> in Appendix 1.
- You can click to export the employee's resignation details locally. For detailed operation, please refer to <u>6. "Export"</u> in Appendix 1.

3.6 Workflow

3.6.1 Role

- 1. Add a Role
 - Select [Personnel] > [Workflow] > [Workflow Role] > [Add] to add a user role.

Add		×
Code*:	32	
Role Name*:		
Description:		
	Confirm	Cancel

Enter the details as shown below:

Code: Enter a unique code for the user role.

Role Name: Enter a unique name for the user role.

Description: Enter the description of the role.

- Click [Confirm] after entering the details.
- 2. Delete a Role

Select the role (or roles). Click [Delete] on the upper left of the list or click in the same row of the role to be deleted.

Prompt		×
Are you sure to de	elete the select	ed 1 items?
	Confirm	Cancel

Click [Confirm] to delete the role.

∕∕≤Note:

A role cannot be deleted when it is being used by employees or workflow.

- 3. Assign Employee
 - Select the corresponding workflow role and click [Assign Employee] to assign user role to employee(s).

De	partme 👻	Department	*	Q	Employee		Sele	cted	0						
	Employee ID	First Name	Last Nan	ne	Department			En	ployee I	D \$	First Nam	ie 🌐	Last Name 🌐	Departn	nent

- Select the employee in the employee's list to whom you want to assign the user roles in batches (you can filter by Department, Name, Code, etc).
- Click [Confirm] to assign the employee role.

3.6.2 Workflow Builder

Add a Workflow Builder

Take [Add for Employee] as example.

 Select [Personnel] > [Workflow] > [Workflow Builder] > [Add for Employee] to set a workflow for employee.

Add for Emp	oloyee					×
Code*	3			Name*		
Is Leave	No			Employee*	v	
Content Type		V				
Start Date*				End Date*		
*Workflow Se	etup					
22						Add
Approval S	cope*	Own Department	~	Approver Role*		Ŧ
	cation	Own Department	T	Notifier Role		v
					Confirm	Cancel

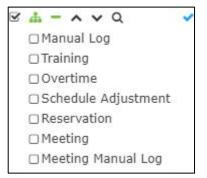

Enter the details as shown below:

Code: Enter the code for the workflow.

Name: Enter the name of the workflow.

Is Leave: After the function is enabled, you can create a workflow for leave.

Content Type: When the **Is Leave** function is disabled, you can choose to create the following types of workflows:

When the **Is Leave** function is enabled, you can choose to create the following types of workflows:

2. Users can select multiple content types to create workflow for different content types at the same time while the content types have the same workflow.

Employee: Enter employee ID or employee name to search the employee that executes the workflow.

Start Date/End Date: Enter the Start Date and End Date of the workflow.

Set up the workflow node. There will be one default workflow node, users can click [Add] to add more workflow nodes.

*Workflow Setup					
11					Add
Approval Scope	Own Department	*	Approver Role*	2011001000	*
Notification Scope	Own Department	w.	Notifier Role		v

Enter the details as shown below:

Approver Role

Click the drop-down button to select the role that approves the node.

Approval Scope

- If the "Own Department" is selected, then the employee in the selected role can approve the applications from the own Department only.
- If "All" is selected, then the employee in the selected role can approve the application from all the Departments.

Notifier Role

Click the drop-down button to select the role to receive the notifications.

Notification Scope

- If the "Own Department" is selected, then the employee in the selected role can receive the application notifications from the own Department.
- If "All" is selected, then the employee in the selected role can receive the application notifications from all the Departments.

After entering the details, click [Confirm] to save the workflow.

From Day & To Day

<u>#</u>				Add
Approval Scope*	Own Department		Approver Role*	
Notification Scope*	Own Department	v	Notifier Role	 v
From Day		Days	To Day	Days

• After the **Is Leave** function is enabled, the user can set workflow for the leave approval process. The system will perform different workflows according to the number of days an employee asks for leave.

For example:

The user with ID 1 belongs to the HR Department.

The user with ID 2 belongs to the HR Department, the role is a Manager.

The user with ID 3 belongs to the HR Department, the role is Boss.

The manual log workflow for the user with ID 1 is shown below:

Code*	33			Name*	Manual L	og Workflow		
ontent Type*	Man	ual Log 👘	r	Employee*	1 Mike	×	T	
Start Date*	2021	-07-01		End Date*	2021-07-	31		
*Workflow Set	tup							
<u>.81</u>								Add
Approval S	cope	Own Department	1.	Appro	over Role*	Manager		
Notification S	cope	Own Department		No	tifier Role	Boss		w

The application for manual log of the employee should go through two nodes. One is the Manager and the other is the Boss. The workflow of the nodes is shown in the figure below.

Workflow Setup					
<u>.0.</u>					Add
Approval Scope	Own Department	Ŧ	Approver Role*	Manager	Ŧ
				Boss	

One is the Manager and the other is the Boss. The workflow of the nodes is shown in the figure below.

Workflow Setup					
<u>. 89</u>					Add
Approval Scope	Own Department	Ŧ	Approver Role*	Manager	*
	Own Department	~	Notifier Role	Boss	~

Select the Workflow Role and scope for Approve and Notifier. The scope approval of the above example is selected as the Own Department. The first node is the Manager and the approver is also the same. The second node is the Boss and the notifier is also the Boss.

Click [Confirm] and the node list will be displayed as shown in the below image:

ZKTeco	Personnel	Device Attendance	Access Control	Payroll	Visitor Me	eting MTD	System		1389	0

When user No. 1 submits the application for manual log, user No. 2 will receive the application notification. When user No. 2 approves the application, user No. 3 will receive the application notification. When every node approves the application, user No. 1 will receive the email notification for approval. (The application approval by ordinary users can be performed within the self-service and mobile app of the employees)

3.6.3 Delete Workflow

1. On the workflow interface, select the workflow(s) and click [Delete] on the upper left of the

list or directly click in the same row of the workflow to be deleted.

Prompt		×
Are you sure to de	elete the selec	ted 1 items?
	Confirm	Cancel

2. Click [Confirm] to delete the workflow.

⊯≤Note:

The Workflow that is currently being used cannot be deleted.

3.7 Document Management

3.7.1 Add Document Type

1. Select [Personnel] > [Configurations] > [Document] > [Add] to add a document type.

Add	×
Certification Code*:	
Certification Name*:	

Enter the details as shown below:

Certification Code: Enter the Certification Code.

Certification Name: Enter the Certification Name.

2. Click [Confirm] to save the document details.

⊯Note:

- You can click [Import] to import the document type in another software or system. For detailed operation, please refer to <u>5."Import"</u> in Appendix 1.
- 2. You can click to export the document type locally. For detailed operation, please refer to <u>6."Export"</u> in Appendix 1.

3.7.2 Delete Document Type

Select the certificate type(s) to be deleted and click **[Delete]** on the upper left of the list or click in the same row of the document to be deleted.

Prompt		×
Are you sure to de	lete the select	ed 1 items?
	Confirm	Cancel

Click [Confirm] to delete the document details.

∕∕⊗Note:

The document which is being currently used cannot be deleted.

3.8 Custom Attributes

This function lets you manually create a personalized field based on the Organizational requirement. And the created attribute will get reflected in the Employee module.

3.8.1 Create a New Attribute

1. On the **Personnel** module, click **[Configurations]** > **[Custom Attribute]** > **[Add]** to manually create a field.

Attribut	te Name*:		
Inp	ut Type *:	Text	v
	Unique		
	Enable		

On the Add window, enter the following:

Attribute Name: Enter the required attribute name.

Input Type: Select the format type from the drop-down list (default format: Text)

Unique: Select the Unique check box to set the value of the field as unique.

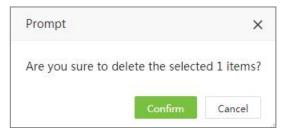

Enable: Select the Enable check box to activate the field.

2. And then, click **Confirm** to save and update the new attribute.

3.8.2 Delete Custom Attribute

Select the custom attribute(s) to be deleted and click [Delete] on the upper left of the list or click

in the same row of the custom attribute to be deleted.

3.9 Configuration

You can set the type and sorting method of employee job numbers here. At the same time, set the verification parameters for the employees to punch in the web page.

3.9.1 Employee ID Setting

ZKTeod	Persor	nel Device	Attendance	Access Control	Payroll	Visitor	Meeting	MTD	System		•
🔊 c	Departmen	nt × Configuration	×								
📥 Organization	Employ	ree ID Setting									
Workflow	-	Number Dis Employee ID	able	Order By Di Number Employee ID	sable						
0 6 Configurations	^			Employee ID							

Number Employee ID: After the function is enabled, the employee ID can only be composed of numbers.

Order By Number Employee ID: When the function is enabled, employee IDs will be arranged in natural order.

3.9.2 Staff Check in Setting

Staff Check In Setting	
verify Finger Enable Printer	Take capture (Disable)
Check IP address Disable	
Save	

Verify Finger Printer: After the function enabled, employees need to verify their fingerprints when punch in the page.

Take Capture: After the function enabled, employees need to take photos when punching in the page.

Check IP Address: If this function is enabled, employees need to verify the host IP when clocking in the page.

4 Device Management

Device Management includes the installation of devices and setting the device parameters. It allows you to manage the connected devices from the system, thereby implementing virtual management. It also includes uploading the user attendance data, downloading the configuration information, and exporting various reports.

4.1 Device Management

Initially, communication parameters must be set to connect the devices. Once the communication is successful, you can view the information on the connected devices and perform operations such as remote monitoring, uploading, and downloading.

Select **[Device]** > **[Device]** to view the Device Management interface. All the connected T&A devices are displayed in a list as shown in the below image.

Area: Displays the area in which the device is defined in the software.

Serial Number: Displays the Device Serial Number.

Device IP: Displays the IP address of the device.

Device Model: Displays the model of the device.

Firmware/Push Version: the build firmware/push version.

- State: 🧖 indicates that the device is connected,
 - indicates that the device is not connected,

indicates that the user needs to assign an area except for the default area to the device.

Last Activity: Represents the last time the command was executed.

User Qty: Displays the number of employees already registered on the device.

FP Qty: Displays the number of Fingerprints registered.

Face Qty: Displays the number of Faces registered.

Palm Qty: Displays the number of Palms registered.

Transaction Qty: Displays the total number of attendance records.

Last Sync: Displays the time in which the system issued data to the device last time.

Cmd: Display the command quantity that have not been executed. Click the quantity that can check the detail command list from the pop-up page.

4.1.1 Add a T&A Device

There are two ways to add a T&A device: manually adding a T&A device and automatically adding a T&A device.

1. Manually Add a T&A Device

• Select [Device] > [Device] > [Add] to add a device manually.

Device Name*					
Serial Number*			Device IP*		
Area*		~	Time Zone*	Etc/GMT+8	
ttendance Device*	Yes	Ŧ			
equest Heartbeat*	10	Seconds	Transfer Mode*	Real-Time	·

Enter the details as shown below:

Device Name: Enter the device name maximum of 50 characters.

Serial Number: Enter the serial number of the device.

Device IP: Enter the IP address of the device.

Area: In the drop-down list, select the area to which the T&A device belongs.

Time Zone: When a time zone is selected, the time on the T&A device will be automatically synchronized to the standard time in the particular time zone.

Attendance Device: Select whether the device is an attendance device or not.

Heartbeat Request: Set the time for the device to automatically transmit the data to the system.

Transfer Mode: Select the data transfer mode between software and devices. The Transfer mode can be real-time or at a specified time.

Transfer Mode*	Real-Time	*
	Real-Time	
	Timing	

• Click [Confirm] to add the device.

∕∕≤Note:

When an employee is added to a device, the employee information will be uploaded to the server automatically. It will be synchronized with other devices in the same area.

2. Automatically Add a T&A device

It is unnecessary to manually add T&A devices of certain models. You can connect such devices to the system via HTTP by completing the settings on the devices. Once the devices are connected to the Internet, the device list will display all the T&A devices. Please refer to the relevant user manuals for the detailed operating procedures.

▲ **Note:** The devices added automatically must be assigned to custom areas to communicate with the software.

4.1.2 Edit a Device

Click a device name or click *in the same row of the device to be edited.*

Device Name*	Auto add		Enable Access Control*	No	*
Serial Number*	6585205300025		Device IP*	192.168.55.69	
Area*	Ihl-revface18	~	Time Zone*	Etc/GMT+8	Ŧ
ttendance Device*	Yes	~			
equest Heartbeat*	10	Seconds	Transfer Mode*	Real-Time	

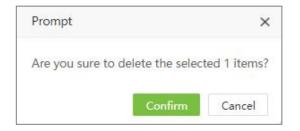

Enable Access Control: Set whether the device is an access control device or not. if yes, then the device will be added to the Access Control Module automatically. This menu will appear only when you assign an area (except area whose area code is 1) to the device.

∕ ⊗Note:

Serial Number and Device IP are read-only. The device name must be unique.

4.1.3 Delete a Device

1. Select the device and click [Delete] above the device list or click in the same row of the device to be deleted.

2. Click [Confirm] to delete the selected device.

4.1.4 New Area

Select [Device] > [Device] > [New Area] to create a new area. For detailed operation, please refer to 3.3.1Add an Area.

4.1.5 Clear Pending Command

Select the device and click [Device Menu] > [Clear Pending Command]. Click [Confirm] to clear all the pending commands.

Prompt		×
Are you sure to clear commands?	all the pending	
	Confirm	Cancel

4.1.6 Data Clean

1. Clear Attendance Data

• Select a device and click [Data Clean] > [Clear Attendance Data].

Prompt	×	
Are you sure to clear all the transactions in selected 1 device(s)?		
Confirm Cance	el	

• Click [Confirm] to delete all transactions from the device.

2. Clear Capture Photo

You can clear the attendance photos on a T&A device.

• Select a device and click [Data Clean] > [Clear Capture Photo] (It is mainly used to clear the attendance photos and the blacklisted photos):

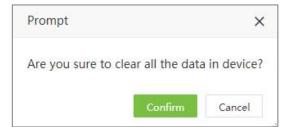

Prompt		×
Are you sure to c device(s)	lear the ca <mark>ptur</mark> e o	f selected 1
	Confirm	Cancel

• Click [Confirm] to delete the captured photos.

3. Clear All Data

You can clear all the data on a T&A device.

• Select a device and click [Data Clean] > [Clear All Data].

• Click [Confirm] to delete all the data.

4.1.7 Data Transfer

1. Upload User Data

It is used to upload the user data from the device to the software.

Select a device and click [Data Transfer] > [Upload User Data].

Employee*	Specified	-
Employee ID	All	
	Specified	
		11

Here you can select to upload all or specified user data to the software.

• Click [Confirm] to upload the user data.

∕∞Note:

You can upload the personal information on a T&A device to the server in batches by uploading it again. If time is out, uploading will be interrupted and you need to perform the upload operation again.

2. Upload Transaction

You can upload the attendance transactions from the device to the software.

• Select a device and click [Data Transfer] > [Upload Transaction].

Transaction*	Specified 🔺
Start Time	All
Start Time	Specified
End Time	

Here you can select to upload all transactions or set the start time and end time to upload the transactions within the specified time.

• Click [Confirm] to upload transactions.

3. Sync Data to Device

Synchronize data from the server to all the devices. Generally, this operation needs to be performed only when the data in devices are inconsistent with those in the server due to Internet abnormalities or other conditions.

In the device list, select the device to which data needs to be synchronized and click [Data Transfer] > [Sync Data to Device]. Select the data to synchronize.

Employee 🔘 N)	Photo	No
Fingerprint 🔵 N		Face 🔵	No
Palm 🔵 No	Bio	-Photo	No
inger Vein 🔵 N			

Click [Confirm] to synchronize the data.

∕∞Note:

Synchronizing the data to the devices will delete the existing data (excluding event records) in the devices and then the setting details will be re-downloaded. Ensure that the internet connection is smooth and there is no power failure while performing this operation.

4.1.8 Device Menu

1. Reboot

Reboots a device through the system remotely.

In the device list, select a device to reboot, and click [Device Menu] > [Reboot].

Prompt		×
Are you sure to re	eboot of selecte	ed device(s)?

Click [Confirm] to reboot the device.

2. Read Information

Reads the number of persons, attendance records, and the firmware version on a device.

Prompt		×
Are you sure to read i device	nformation fro	om selected
	Confirm	Cancel

Select a device and click [Device Menu] > [Read Information] and click [Confirm] to download the information.

3. Enroll Remotely

This function is applicable when the device administrator is not available to operate the device and enroll the fingerprint.

• Select the corresponding device, and click [Device] > [Device] > [Enroll Remotely] to access the enroll remotely interface:

Bio Type*	Fingerprint	
mployee ID*	1122	
Finger*	(Right Hand)Fore Finger 🔍	

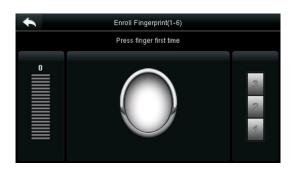

Enter the details as shown below:

Bio Type: Select the biometric type. Currently, it supports fingerprint only.

Employee ID: Enter the Employee ID.

Finger: Select the corresponding finger which needs to be enrolled remotely.

• Click [Confirm]. The software will issue a command to the device, and the device will open the fingerprint enrolling menu. The employee just needs to enroll the fingerprint.

4. Duplicate Punch Period

Set the duplicate punch period on the device.

• Select a device and click [Device Menu] > [Duplicate Punch Period].

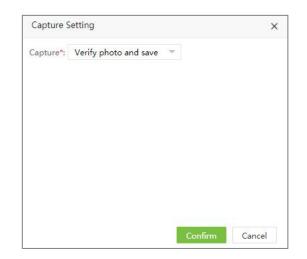

Duplicate Punch Period		×
Duplicate Punch Period (m)*:	1	Minutes
	Cor	nfirm Cancel

• Click [Confirm] to save the duplicate punch period.

5. Capture Setting

Set the capture mode of attendance photos during verification.

• Select a device and click [Device Menu] > [Capture Setting] to set the capture mode.

• Click [Confirm] to set the capture mode.

6. Upgrade Firmware

Upgrades the firmware for the corresponding device.

• Select a device and click [Device Menu] > [Upgrade Firmware].

Upgrade Firmware			×
Upgrade File*: Choose File	No file chosen	emfw.cfg	
	c	onfirm	Cancel

• Click [Choose File] to upload the corresponding firmware (emfw.cfg) file. Click [Confirm] to upgrade the firmware for the device.

7. Daylight Saving Time

• Select corresponding device(s), click [Device Menu] > [Daylight Saving Time] to open the setting page of daylight-saving time.

	Confirm	Cancel

4.3 Device Short Message Management

The software supports short messages which can be sent to the designated device from the system.

- 4.3.1 Add a Public Message
 - Select [Device] > [Message] > [Public] > [Add].

Device*		Ŧ
Start Time*		
Duration*	60	Minute(s)
Content*		

Enter the details as shown below:

Device: Select a device to which the message is to be sent.

Start Time: Select the start time for issuing the short message.

Duration: Enter the message display duration.

Content: Enter the short message content.

- Click [Confirm] to save the details.
- 4.3.2 Add a Private Message
 - Select [Device] > [Message] > [Private] > [Add].

Enter the details as shown below:

Employee: Select the employee to whom the message is to be sent.

Start Time: Select the start time for sending the short message.

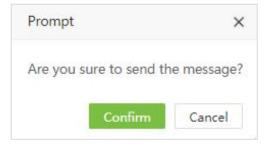

Duration: Enter the message display duration.

Content: Enter the short message content.

• Click [Confirm] to save the details.

4.3.3 Send Message

• Select the short message to be sent and click [Send Message].

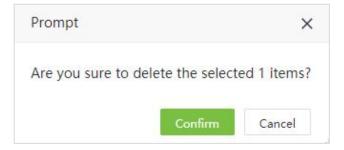

• Click [Confirm] to send public messages to the designated devices and private messages to the

devices to which the particular employees are added.

4.3.4 Delete Short Message

When a short message is deleted on the software, it will be deleted in the device also.

• Select the short message and click [Delete] to delete it.

• Click [Confirm] and the message will be deleted from the list and the device.

4.4 Employee

This employee list is used to show the related employee data fields from device, such as employee's biometric templates, device privilege, verify mode, area and so on. These kinds of fields will not show on the employee list of Personnel Module, but it can be edited.

4.5.1 Add Work Code

• Select [Device] > [Work Code] > [Add] to access the adding work code interface:

Confirm	Cancel
	Confirm

Enter the details as shown below:

Code: Enter the Work Code number.

Name: Enter the name of the Work Code.

• Click [Confirm] to save the details.

4.5.2 Issue Work Code to Device

Issues work code to the device.

• Select [Device] > [Work Code] > [Send to Device].

Device*	Auto add	-

• Click [Confirm] to send the work code to the device.

4.5.3 Remove Work Code

• Select [Device] > [Work Code] > [Remove from Device].

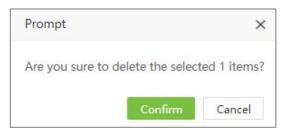

e u bil	- 	
Device*	Auto add	v

• Click **[Confirm]** to remove the work code from the device.

4.5.4 Delete Work Code

Deletes the work code from the software.

• Select the work code and click [Delete]

• Click [Confirm] to delete the work code.

4.6 Bio-Template

Displays detailed information about employees' biometric templates.

- 1. Users can export the transaction table in .xls, PDF, CSV or .txt file formats based on the requirements. Please refer to <u>6. "Export"</u> in Appendix 1 for detailed operation.
- 2. Users can select the fields to be displayed in the transaction table based on requirements (the fields are displayed if the columns are checked).
- 3. Users can change the column width by dragging the column border to the left or right.
- 4. Users can define the number of records to be displayed on each interface in the transaction table.
- 5. Click any row of the attendance record and view the corresponding photo and employee's information on the right side.

4.8.2 Upload USB Transaction

You can import the attendance records to the software from the USB disk.

• Click [Upload USB Transaction]

Upload File: Click [Choose File] and select the attendance record file to be uploaded.

Encrypted File: Enable it when the uploaded file is encrypted.

• Click [Confirm] to upload the attendance records to the software.

4.8.3 Download Attendance Photo

You can import the attendance records to the software from the USB disk.

1. Click [Device] > [Data] > [Transaction] > [Download Attendance Photo] to open the download setting page.

Delete a Specific Command

• Select the required log from the list and click on Delete or click on to clear the required

log.

• Click Confirm to ensure and delete the selected log from the Command History interface.

Bulk Delete

This function lets you delete the old records in bulk by setting the log retention period. Hence, except for the logs, which fall within the specified retention time, all the old logs will get deleted.

To delete the records in bulk:

- On the History Command interface, click Bulk Delete to set the retention time for the logs.
- On the **Bulk Delete** interface, click on the **Retention Time** field, and a calendar window pops up.
- On the **Calendar** window, select the required date, click **Select Time** to update the necessary time, and click **Confirm** to save the selected date and time.
- And then click **Confirm** to save and revise the records until the specified retention time.

4.13 Mobile App

4.13.1 APP Account

Displays the Mobile APP accounts enabled by the employees. The employee can log into the APP by entering the employee ID and self-service login password. The interface displays the User name, Login time, Last active time, Client ID, Device token, Client category, Run status (whether the user is online or not), APP status (whether the APP is enabled or not).

1. Push Notification

• Select [Device] > [Mobile APP] > [Account] and select the corresponding account. Click [Push Notification].

Push Notification	×
Content*:	

• Enter the notification content. Click [Confirm] to send the push notification.

∕ Note:

This feature is only used to test whether the notification can be successfully pushed to the mobile app or not. The content of the notification will not be displayed on the mobile app.

2. Force Offline

If a user is active in multiple mobile phones, you can use Force Offline Function to make the other mobile apps inactive.

• Select [Device] > [Mobile APP] > [Account] and select the corresponding account. Click [Force Offline].

• Click [Confirm], to make the mobile app inactive.

∕≪Note:

Forced offline accounts can be still logged in with the Employee ID and self-login password.

3. Disable

• Select [Device] > [Mobile APP] > [Account] and select the corresponding account. Click [Disable].

Prompt		×
Are you sure to disa	ble the de	vice 1 items
	Confirm	Cancel

• Click [Confirm] to disable the account.

∕ ⊗Note:

A disabled account cannot be logged in unless the account is enabled.

4. Enable

• Select [Device] > [Mobile APP] > [Account] and select the corresponding account. Click [Enable].

- Click [Confirm] to enable the account.
- 5. Delete Account
 - Select [Device] > [Mobile APP] > [Account] and select the corresponding account. Click [Delete].

Prompt		×
Are you sure to dele	te the select	ed <mark>1 item</mark> s?
	Confirm	Cancel

• Click [Confirm] to delete the account.

4.13.2 Announcement

The software supports pushing announcements to the App.

- 1. Push Public Notice
 - Select [Device] > [Mobile APP] > [Announcement] > [Push Public Notice].

Subject*			
Content*			
		1	

Enter the details as shown below.

Subject: Enter the subject of the notice.

Content: Enter the content of the notice.

- After entering the details, click [Confirm] to send the push notification to all mobile app users.
- 2. Push Private Notice

• Select [Device] > [Mobile APP] > [Announcement] > [Push Private Notice].

De	partme 🐨	Department	~ Q	Employee		Sele	cted 2				
	Employee ID	First Name	Last Name	Department			Employee ID‡	First Name‡	Last Name÷	Department

4.14 Geo-fence

This function facilitates setting up a geographical boundary using GPS or RFID technology which limits the Employee to access the Attendance Punch via mobile devices.

4.14.1 GPS Location

1. Add GPS Location

Add function lets you set the attendance punch limit for the Employees to access Attendance Punch from the mobile device based on the work location.

Select **[Device]** > **[Geo-fence]** > **[Location Setup]** > **[Add]**, to add the required location for the employee attendance via mobile phone.

ZKTECO	Personnel	Device	Attendance	Access Control	Payroll	Visitor	Meeting	MTD	System			697	0) -

			Google HAIN	IAN	Map data	B2020 Google, SK telec	om Terms of Use							
						Confin	m Cancel							

On the Add window, enter the following details:

Alias: Enter an alternative name for the location.

• This function is integrated with Google Map to facilitate positioning.

Location: The address of the location gets updated through the Map

- On the [Location] field, enter the required address and press the [Enter] key or on the Google Map interface, enter the specific location name in the [Please enter location] field.
- And the software will automatically update the location information, including the exact location name, longitude, and latitude details.

Longitude: The Longitude gets automatically updated through the Map.

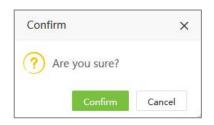

Latitude: The Latitude gets automatically updated through the Map.

- Users can also drag the **Y** to the required position on the google map; hence, the software will automatically update the location information, including the exact location name, longitude, and latitude details.
- Click [Confirm] to save the location information.

2. Delete GPS Location

• Select [Device] > [Geo-fence] > [GPS Location] and select the required location address to be

deleted. Then click [Delete] or the 🔟 corresponding to that location.

• Click [Confirm] to delete the selected location.

4.14.2 Employee Setup

This function facilitates setting the location range for specific employees, which means the employees can punch for attendance in the Mobile APP only within the specified range.

 On the [Device] interface, click [Geo-fence] > [Employee Setup] > [Add] to add the Employees to the specific Geo Location.

De	partme 👻	Department	- C	Employee		Selected	0			
	Employee ID	First Name	Last Name	Department		Em	ployee ID 🍦	First Name 🗢	Last Name 🗘	Department

20 re	ecords per page	• 🗸 Total 167	Records <	> Jump 1	Page					
oca	ition*			istance* 50		Meter(s)				
art I	Date*		Er	nd Date*						

On the Add window, enter the following details:

Employee: Select the required employees who needs to punch within the same range.

- On the Add window, select the required Employees' names from the list on the left.
- The selected Employees' names will reflect on the right side of the Add window.

• Select from the Department drop-down list or use the Employee search option (search by Employee name or Employee ID) to search for the required Employees.

Location: Select the required access location from the drop-down list.

 Please note, Employees can have more than one access location if there is a necessity to punch-in/out for attendance during their on-duty period or business trips in more than one place.

Distance: Enter the required perimeter distance to provide access to the attendance punch on the mobile device, for the selected geographical area.

Start Date / End Date: Set the valid period for the mobile attendance punch.

• Click [Confirm] to save the details. When the employee punches out of range on APP, it will show the following prompt on the APP:

Re	cent Punches		0
	Attendance Photo		
	Prom	ipt	
G	Out of lo	cation	
	ок		
	Weekly	Monthly	\supset

4.14.3 Department Setup

This function eases you to set a geographical boundary using GPS or RFID technology to a Department. It limits the Employees of that specific Department to access Attendance Punch via mobile devices only within the specified range.

Select [Device] > [Geo-fence] > [Department Setup] > [Add].

Department	 ~				
Location*	 Ŧ	Distance*	50	Meter(s)	
Start Date*		End Date*			

Enter the details as shown below:

Department: Select the Department.

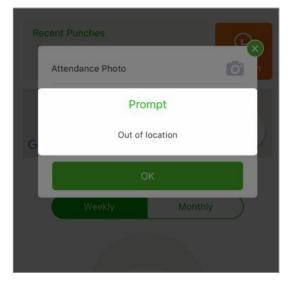

Location: Select the required access location from the drop-down list.

• Please note, a Department can have more than one access location if there is a necessity for the Employees to punch-in/out for attendance during the on-duty period or business trips in more than one place.

Distance: Enter the range for the APP punches (unit is meters).

Start Date / End Date: Set a valid time period for this setting.

• Click **[Confirm]** to save the details. While the employee belonging to the specified Department punches out of range on the APP, it will display the following prompt on APP:

Set the retention days for data, including transactions, command, device log and upload log. It is set as 9999 to keep all data by default.

5 <u>Attendance Management</u>

The system can exchange the data with the T&A devices and collect the attendance records. The primary functions implemented by the attendance system include User management, management of Attendance parameters, Shift timetables, Scheduling, Daily maintenance, Attendance calculation, Attendance reports, and Attendance devices.

5.1 Workbench

On the workbench, you can quickly schedule shifts, calculate attendance, and generate attendance reports for employees. This will improve your operation efficiency.

1. Schedule Setting Steps:

Click the icon to enter the interface for setting rest time, schedule, shift and shift arrangement.

2. Quick Setup:

Click the function icon to quickly create a schedule and arrange shifts for employees.

1. Add a Pay Code

• Click [Attendance] > [Setup] > [Pay Code] > [Add] to add new pay code.

Code*			Name*		
Type*	Leave	Ŧ	Paid	No No	
Unit*	Hour	Ŧ	Symbol		
Round Off*	Round Off	-	Minimum*	0.1	
Display	Yes		Order*	999	
olor Settings	×				
Description					
		11			

Enter details as shown below:

Code: Enter the code number of the pay code.

Name: Enter the name of the pay code.

Type: Select the type of pay code from the drop-down list. It can be set as Regular, Overtime, Leave, Exception and Training.

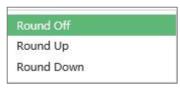

Regular	
Overtime	
Leave	
Exception	
Training	

Paid: Enable this function when the pay code type is leave, and the pay code will be set to paid leave.

Unit: Select the unit of pay code from the drop-down list.

Symbol: Enter the symbol of pay code that shows on the report.

Round Off: Select the rounding rule of pay code from the drop-down list. It can be set as Round Off, Round Up, Round Down.

- Round-down: Omit the decimal part if it is smaller than the minimum unit.
- ii. Round-off: Count the decimal part if it reaches half of the minimum unit.
- iii. Round-up: Count the decimal part if it is smaller than the minimum unit.

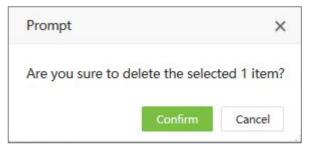

Minimum: Set the minimum value for rounding rule.

Display: Toggle Yes if the pay code needs to be displayed on the attendance report.

Order: Set the order of the pay code to be displayed on the attendance report.

Color Setting: Select the color of the pay code to be displayed on the attendance report.

- Click [**Confirm**] to save the pay code.
- 2. Delete a Pay Code
 - •Select the pay code and click [Delete] or click III in the same row of the pay code to be deleted.

• Click [Confirm] to delete the pay code.

5.2.2 Fixed Code

Click [**Attendance**] > [**Setup**] > [**Fixed Code**], there are 19 fixed pay code defined by the system, can be modified, but cannot be added or deleted.

5.3 Rule

5.3.1 Global Rule

General rules can be applied to all the Departments. All the general attendance parameters can be set here.

1. Basic Setting

Weekend1/Weekend2: Set the weekend of the week.

Color Setting: Select the color of weekend to be displayed on the attendance report.

Start Off for the Week: Set the tone for the week ahead.

Duplicate Punch Interval: Set the interval (in minutes) for duplicate punch. If it is set to 1 minute and the user tries to punch several times within a minute, the system will only accept the first punch.

2. Rule for Non-scheduled Days

This setting is for the personnel who do not have a time schedule but have the attendance punch

records and need to make time and attendance calculation.

ZKTeco	Personnel I	Device Atter	ndance	Access Control	Payroll	Visitor	Meeting	MTD	System	Å ⁸⁴ 💽
🏷 Q 🥶	Pay Code 🗙 Group	Global Rule	×							
🔹 Setup 👻	Basic Setting Rule f	or Non-scheduled Days	Overtime Ru	le Calculation Setting	APP Setting	Attendance	e Alert Setting			
🛞 Rule 🔺							,			
Global Rule	Max Work Hours	* 24.0	Hour(s)	Day Change Time*	00:00:00					
Department Rule	Paring Rule	* First And Last	v							
Group Rule	Daily Overtim	e Enable 🔵								
🗂 shift 🗸 🗸	Work Hours Assign T	o Regular	Ŧ	Work Hours Range*	0.0	Hour(s)	- 6	Hour(s)		
🛗 Schedule Assignment 🔻	Work Hours Assign T	o OT2	v	Work Hours Range*	7	Hour(s)	- 9	Hour(s)		
Schedule Preview	Work Hours Assign T	o OT3	v	Work Hours Range*	11	Hour(s)	- 15	Hour(s)		

Max Work Hours: Set the maximum work hours.

Day Change Time: Set the time point to distinguish the punch records belonging to which day. Example, Day Change Time is set as 8:00 am, then the punch records before 8:00 am will belong to the previous day.

Paring Rule: Set the paring rule of punch records.

First And Last: Take the first punch record as Check-In, and the last punch record as Check-Out.

Odd Even: Pick the Check-In and Check-Out record according to odd even.

Punch State Based: Pick the Check-In and Check-Out record according to the punch state of the records.

Daily Overtime: Enable it to set the overtime rule for the no schedule day. Users can assign the work hours as per the overtime pay code.

🗂 Shift 🛛 👻	Work Hours Assign	n To Norm	al OT	Ŧ	Work Hours Range*	8	Hour(s)	- 9	Hour(s)
🛗 Schedule Assign 👻	Work Hours Assig	n To OT1		T	Work Hours Range*	10	Hour(s)	- 11	Hour(s)
🛗 Schedule Preview 🔻	Work Hours Assig	To OT2		Ŧ	Work Hours Range*	11	Hour(s)	13	Hour(s)

Example: The Rule for Non-scheduled Days is as following:

If the actual work hour is 12 hours, then:

•First, the software will compare actual work hour with Work Hour Range 11 hours - 13 hours, 12 hours is in this range, so OT3 = 12 hours – 11 hours = 1 hours, the remaining actual work hour is 12 hours – 1 hour = 11 hours.

- Second, the software will compare the remaining actual work hour with Work Hour Range 10 hours 11 hours, so OT1 = 11 hours 10 hours = 1 hour. The remaining actual work hour is 11 hours 1 hour = 10 hours.
- And Finally, the software will compare the remaining actual work hour with Work Hour Range 8 hours – 9 hours, so Normal OT = 9 hours - 8 hours = 1 hour. The remaining actual work hour is 10 hours – 1 hour = 9 hours.

∕≤Note:

The overtime matching rule is to match from bottom to top and sort the overtime that matches the duration for overtime calculation.

What are Overtime levels?

When an employee works more than the needed hours, the company management sets overtime levels such that, the employee gets paid according to his worked overtime level. Overtime levels must be in hours and must be set in such a way that OT Level 3> OT Level 2 > OT Level 1.

E.g.: OT Level 1 - 3 hours

OT Level 2 - 5 hours

OT Level 3 – 7 hours

For each OT level, you may set distinct pay levels. Consider an employee A works for 3 hours and employee B works for 5 hours. The worked hours of employee A falls under Level 1. The worked hours of employee B falls under both Level 1 and Level 2. So, employee B gets consolidated pay by considering both levels.

3. Overtime Setting

Overtime Rule: It can be set to "Disable Overtime" to disable the overtime function. "Calculation OT" calculates the overtime based on the attendance punch time, "Approval OT" calculates the overtime based on the overtime application, "Approval OT Priority" preferentially calculates the

overtime on the overtime application, and "Minimum OT" calculates the minimum overtime between "Calculation OT" and "Approval OT".

Weekend Overtime: While it is enabled, then the overtime calculation rule for weekend will apply the rule set here. The calculation method is the same as Daily Overtime mentioned above.

Holiday Overtime: While it is enabled, then the overtime calculation rule for holiday will apply the rule set here. The calculation method is the same as Holiday Overtime mentioned above.

5.4 Break Time

While configuring the shift timetable, break time can be selected. More than one break time can be added to one shift timetable.

5.4.1 Add a Break Time

1. Select [Attendance] > [Shift] > [Break Time] > [Add] to add a break time.

Add							×
	Name*			Calculate Type*	Auto Deduct	~	
Basic Setting	Rule Setting						
	Start Time*	12:00:00		End Time*	13:00:00		
	Duration*	60	Minute(s)				
						Confirm	Cancel

Enter the details as shown below:

Name: Enter the Break Time name maximum of 50 characters.

Calculate Type: Calculation types for break time are given below:

- **Auto deduct:** Whether the user punches or not, the break time will be the allowable break time in the calculation of attendance.
- **Required Punch:** You must punch during the break time. When staff does not punch, start time/End time will be taken as the start/end time of the break time in the attendance calculation.

For example: If the time range for an attendance punch during the break time is 12:00 to 14:00, the break time is allowed to be 60 min. If A does not punch in during the break time, and B punches at 13:00, then A's break time is 120 min, and B's break time is 60 min.

2. When the Calculation Type is Punch Time is Required, early return and late return should be considered as shown in the figure below:

Add						×
	Name*			Calculation Type*	Punch Time Is Required	
Basic Settings	Rule Settings	s Punc	n Settings			
	Start Time*	12:00:00		End Time*	13:00:00	
	Duration*	60	Minute(s)			
					Confirm	Cancel

a) Basic Setting

Start Time: Set the start time of the break time. Time Settings are shown in <u>4."Time Selection"</u> in Appendix 1.

End Time: Set the end time of the break time. When the punches are out of the range, then they are invalid.

Duration: The time allotted for break time.

b) Rule Setting

	Name*			Calculation Type*	Punch T	ime Is Required 🛛 🔻	
sic Settings	Rule Settings	Punch Settings	5				
Duplicate	Punch Policy*	Rule Based	~	Duplicate Punch Period*	7	Minute(s)	
Punc	h State Based*	No	~				

Duplicate Punch Policy: The time interval of punch can be set as "Rule Based" or "User Defined". When the users customize it, they need to set the Effective Interval.

Duplicate Punch Period: Set the duplicate punch period.

Punch State Based: Select whether to use the function key or not. When "Yes" is selected, the attendance will be calculated according to the punch status. When "No" is selected, the attendance status will be automatically corrected while calculating the attendance.

c) Punch Setting

Add						×
Name*			Calculation Type*	Punch Time Is Re	equired 🛛 🔻	
Basic Settings Rule Settings	Punch Settings					
Multiple In/Out*	No	Ŧ	Minimum Break Time(m)*	0	Minute(s)	
Early In (Disable					
Late In (Disable					
					Confirm	Cancel

Multiple In/Out: Multiple in/out function. When Multiple in/out is selected as Yes, the users can break-out and break in multiple times.

In the attendance calculation, the time of **breaking-in** each period minus the time of breaking out is taken as the attendance time in of that period.

In the attendance detail report of the day, the break-out of the first period shall be taken as the break-out of the day, and the break-in of the last period shall be taken as the break-in of the day.

Minimum Break Time (m): Set the minimum minute of break time.

Early In: Select whether to calculate the time of early-in or not.

Early In	Enable 🔵				
Early In More Than*	0	Minute(s)	Assign To	2 <u></u>	

While it is enabled, users can set the minimum time of Early In to assign to the pay code which type is overtime.

Late In: Select whether to calculate late in or not.

Late In	Enable 🔵			
Late In More Than*	0	Minute(s)	Assign To	

While it is enabled, users can set the minimum time of Late In to assign to Late In, Early Out and Absence.

5.4.2 Edit a Break Time

- Click the break time or 🧖 in the same row of the break time to be edited.
- After the modifications, click [Confirm] to save the details.

5.4.3 Delete a Break Time

• Select the corresponding break time, click [Delete] at the top left of the break time list or click the

in the same row of the break time to be deleted.

• Click **[Confirm]** to delete the break time.

5.5 Timetable

Set the time periods which are used during the attendance calculation and to set various attendance parameters. The timetable is the minimum unit in the attendance time settings. For example, these settings include work start/end time, allowed late arrival/early leaving duration, whether check-in/check-out is mandatory, allowed time period for check-in/out, break time, and overtime.

Before scheduling the shift, you must set all shift timetables possibly used. Otherwise, the shift is considered invalid.

5.5.1 Add a Normal Timetable

Add a New Normal Timetable

• Select [Attendance] > [Shift] > [Timetable] > [Add Normal Timetable] to add a normal timetable.

Nan	ne*				Work H	lours Assign To*	Reg	ular

Minimum* 60	Minute(s)	Count the Minimum Enable	
Late Out Enable)		
Work Hours Assign To	Ψ.		
Minimum* 60	Minute(s)	Count the Minimum Enable	
			Confirm

Early In: It is to calculate the time of early-in. If it is enabled, users can assign the early -in time to the corresponding pay code by setting the minimum early -in time. If [**Count the Minimum**] is enabled, then the minimum early-in time will be assigned to the corresponding pay code too, or else it will not.

Late Out: It is to calculate the time of late-out. If it is enabled, users can assign the late -out

time to the corresponding pay code by setting the minimum late -out time. If [**Count the Minimum**] is enabled, then the minimum late-out time will be assigned to the corresponding pay code too, otherwise, it will not.

When [Count the Minimum] is disabled, it is mainly applicable to the situation that starts to count overtime only after the early in/late out exceeds specific time period.

Example: Here is a timetable 9:00am - 18:00pm, Check-In Start Time is 8:00am, Check-Out End Time is 19:00pm. Shown in the following figure:

Nam	e* Nancy_Timet	able			Work He	ours Assign To* Reg	ular

Late Out	Enable				
Work Hours Assign To	OT1	~			
Minimum*	30 Mir	nute(s)	Count the Minimum Disable		
				1	Confirm Cancel

The employee who has been assigned this timetable has two attendance records at 8:10 am and 19:00.

Total Earl	y ln = 50 mir	nutes		Total I	Late (Out = 60	minutes
8:10am	8:40am	9:00am	18:	00pm	18	8:30pm	19:00pm

Since [Count the Minimum] is disabled, so:

Normal OT = Total Early In - Minimum = 9:00am - 8:40am = 20 minutes. OT1= Total Late Out - Minimum = 19:00pm - 18:30pm = 30 minutes.

∕≪Note:

Work Hours Assign To	
Minimum*	P2011000
Minimum*	Regular
	Normal OT
Late Out	Weekend OT
W 111 A . T	Holiday OT
Work Hours Assign To	OT1
Minimum*	OT2
wanarnurn	OT3
	Compensatory

Compensatory: A compensating leave type has been added, which can be used when employees arrive early or leave late.

4. Overtime Rule

Name*			Work Hours Assign To*	Regular					
asic Setting Break1	Time Setting	Unscheduled Tim	e Setting Overtime Rule	e Rule Set	ting				
Max OT	Enable		Max OT Duration*	240	Minute(s)				
Overtime	Enable 🕘								
Vork Hours Assign To			Work Hours Range*	0.0	Hour(s)	1000	0.0	Hour(s)	
Vork Hours Assign To		*	Work Hours Range*	0.0	Hour(s)	-	0.0	Hour(s)	
Vork Hours Assign To		*	Work Hours Range*	0.0	Hour(s)	-	0.0	Hour(s)	

Max OT: Users can set the maximum overtime for the required timetable. If the calculated overtime of an Employee exceeds the specified maximum overtime, then the software will

consider the total overtime of the timetable as the defined maximum overtime.

While it is enabled, users can define three overtime levels, counting from top to bottom are overtime level 1, overtime level 2, overtime level 3. Set the work hours range and assign the work hours in the range to corresponding pay code.

Refer to the Daily Overtime Calculation of No Schedule Setting.

5. Rule Setting

Add Normal Timetabl	e						×
Name*			Work Hours Assign To*	Regular			
Basic Settings Break	Time Settings	Unscheduled 1	ime Settings Overtime F	ule Rule Se	ttings		
Clock-In Is Required*	Yes	Ŧ	Clock-Out Is Required*	Yes	¥		
Allow Late-In*	0	Minute(s)	Allow Early-Out*	0	Minute(s)		
Duplicate Punch Policy*	Rule Based	Ŧ	Duplicate Punch Period*	1	Minute(s)		
Punch State Based*	No	*	Day Change Time*	00:00:00			
						Confirm Can	cel

Clock-In/Clock-Out Is Required: Decides whether check-in and check-out are mandatory in the selected time range. If an employee needs to check-in/out, select Yes; otherwise, select No.

Allow Late-In, Allow Early-Out: This refers to the permissible time for late arrival/early leaving before the actual time of late arrival/early leaving starts during the specified working time.

For example, if the allowed time limit is set to 5 minutes and check-in time is set to 9:00. Employee A checked in at 9:03 and Employee B checked in at 9:06. We can conclude that Employee A is not late as the interval between check-in time and check-in start time is less than 5 minutes and Employee B is late for 6 minutes as the interval between check-in time and check-in time and check-in start time exceeds 5 minutes.

Duplicate Punch Policy: The time interval of punch can be set as "**Rule Based**" or "**User Defined**". When the users customize it, they need to set the Effective Interval.

Duplicate Punch Period: Set the duplicate punch period.

Punch State Based: Select whether to use the function key or not. When "**Punch State Based**" is enabled, the attendance will be calculated according to the punch status. Also, users can assign the overtime calculated based on the punch state of Overtime In and Overtime Out to the corresponding pay code and set the Overtime Policy as Pending or Auto-Approved, then

the software will generate an overtime application based on the punch state of Overtime In and Overtime Out.

But when **"Punch State Based**" is disabled, there are two valid records, check-in at 9:00 and check out at 18:00 for attendance calculation.

Day Change Time: Set the time point to distinguish the punch records belonging to which day. Example, Day Change Time is set as 8:00 am, then the punch records before 8:00 am will belong to the previous day. • Click [Confirm] to save the settings.

∕∕⊗Note:

- a. There can be no timetable with the same start time and end time.
- b. Please refer to <u>4. "Time Selection"</u> in **Appendix 1** for time settings.

5.5.2 Add a Flexible Timetable

• Select [Attendance] > [Shift] > [Timetable] > [Add Flexible Timetable].

Add Flexible Time	table								×
Nan	ie*		Work Hours Ass	sign To* Re	gular				
Basic Setting U	nscheduled Time S	Setting Overtin	ne Rule Rule Set	ting					
Check-In*	00:00:00		Check-Out*	00:00:00	Cross	1 -	Days		
Work Time*	480	Minute(s)	WorkDay*	1.0	Da	ys			
Work Type*	Normal Work	~	Color Setting	×					
*Notice 1.All the cross-day	ys setting is base o	n check-in.							
								Confirm	Cancel

Enter the details as shown below:

Name: Enter the name of the flexible timetable maximum of 50 characters.

1. Basic Setting

Check-In: Set the check-in time for the flexible timetable.

Check-Out: Set the check-out time for the flexible timetable. The cross days maximum is 3 days for check-out time.

Work Time: Enter custom working hours.

Work Type: Define the flexible timetable for different types of work such as normal work, day off and weekend.

Workday: It refers to how many workdays are calculated for each shift.

Color Setting: Set the color of timetable to be displayed on the report.

2. Unscheduled Time Setting

Basic Setting Un	scheduled Time Set	ting Overtime F	Rule Rule Setting
Late C	ut Enable		
Work Hours Assign		v	
Minimur	n* 60	Minute(s)	Count the Minimum Enable

Late Out: It is to calculate the time of late-out. Users can assign the late-out time to the corresponding pay code by setting the minimum late -out time. If [Count the Minimum] is enabled, then the minimum early-in time will also be assigned to the corresponding pay code too, or else it will not.

3. Overtime Rule

Refer to "Overtime Rule" on Add Normal Timetable.

4. Rule Setting

Name*		Work	Hours Assign To*	Regular		
asic Settings Unscl	heduled Time Settings	Overtime Rule	Rule Settings			
Clock-In Is Required*	Yes	- Cloc	k-Out Is Required*	Yes	×	
uplicate Punch Policy*	Rule Based	-	Duplicate Punch Period*	3	Minute(s)	
Day Change Time*	00:00:00		Multiple In/Out*	No		
Punch State Based*	No	~				

Clock-In/Clock-out Is Required: Decide whether check-in and check-out are mandatory in the time range. If an employee needs to check-in/out, select Yes; otherwise, select No.

Duplicate Punch Policy: Can be set to "Rule Based" or "User Defined".

Duplicate Punch Period: Set the duplicate punch period.

Day Change Time: Set the time point to distinguish the punch records belonging to that particular day. Example, Day Change Time is set as 8:00 am, then the punch records before 8:00

am will belong to the previous day.

Multiple In/Out: Multiple in/out function. When Multiple in/out is selected as Yes, the users can check-in and check-out multiple times. In the calculation of attendance, the time of checking out in each period minus the time of checking in is taken as the attendance time in that period. In the attendance detail report of the day, the check-in of the first period shall be taken as the check-out of the day, and the check-out of the last period shall be taken as the check-out of the day.

Punch State Based: Select whether to use the function keys or not. If Yes, then users can assign the overtime calculated based on the punch state of Overtime In and Overtime Out to the corresponding pay code, by setting the Overtime Policy as Pending or Auto-Approved, then the software will generate an overtime application based on the punch state of Overtime In and Overtime Out.

Enter the parameters as shown below:

Shift Name: Enter a unique shift name maximum of 50 characters.

Auto shift: It is an intelligent scheduling function. When there are multiple time periods in the shift, the Auto shift can be enabled, and the shift that conforms to the attendance rules. If you disable the Auto shift, interleaved periods cannot be added.

General Setting

Select Timetable: Select the timetable for the shift. Please refer to <u>Add a Timetable</u> for the detailed operation.

After selecting the timetable, click a day on the right to assign the timetable to the corresponding day.

Unit: Includes day, week, and month.

Cycle: Shift cycle period = Number of cycles * Unit of the cycle.

∕≪Note:

The system displays optional dates in the Select Date box based on the values of Unit of Cycle and Number of Cycle.

5.6.2 Edit a Shift

- Click the Shift Name or 🧾 in the same row of the shift to be edited.
- After modifications, click [Confirm] to save the changes.

5.6.3 Delete a Shift

- Select a shift, click [Delete] on the upper left of the shift list or directly click the 🔟 after the corresponding shift to access the shift deletion confirmation interface.
- Click [Confirm] to delete the shift.

5.7 Department Schedule

You can arrange shifts for Departments after setting the attendance timetables and shifts.

Select [Attendance] > [Schedule Assignment] > [Department Schedule] to access the Department scheduling main interface that displays the Department schedules list and Department schedules details. Click any department schedule and the schedule list on the right will display the schedule details of the selected timetable in a chart.

5.7.1 Add Department Schedule

• Click [Add] on the Department Schedule interface to access the schedule addition interface.

5.9.3 Import Employee Schedule

Users can click **[Import]** to import the employee schedule in batch for personnel. For detailed operation, please refer to <u>5."Import"</u> in **Appendix 1**.

5.9.4 Delete Schedule Records

Select the schedule record to be deleted and click [**Delete**] to delete it or click the in the same row of the employee's schedule.

5.10 Temporary Schedule

The temporary schedule is complementary to the existing schedule. If the overtime is to be set to the employees in a shift temporarily, it is necessary to arrange one (or more) timetable(s) for overtime, temporarily. Generally, temporary schedules are scheduled for overtime, like overtime for late shifts, weekends, holidays, and festivals.

For example:

If a specific Employee is assigned already with a schedule, then according to the work requirement, the user can temporarily provide an extra shift to that Employee, where the attendance will get calculated based on the temporary schedule.

So, the calendar will display only that temporarily scheduled shift for that Employee instead of the previously scheduled shift. And the user can clear the temporarily scheduled shift anytime, and the calendar again displays only the previously scheduled shift of that Employee.

5.10.1 Add a New Temporary Schedule

1. Click [Attendance] > [Schedule Assignment] > [Temporary Schedule] > [Add Temporary Schedule] to add a temporary schedule.

Emplo	yee – Q	Employee	July 2	2021				То	day < >	Q	limetable

2. Set the parameters as shown in the below image.

Employee: Select the employees for a temporary schedule (Multiple choices are allowed). Please refer to <u>2."Personnel Selection"</u> in Appendix 1 to select employees.

Date: Select the date for the temporary schedule. (Multiple choices are allowed.)

Timetable: Select a timetable used by a temporary schedule. (Multiple choices are allowed.) Please refer to <u>Add a Timetable</u> to set the timetable.

∕≪Note:

- i. Multiple timetables can be selected for a temporary schedule, but the start time of timetables should not be the same.
- ii. Even though a shift has previously remained scheduled for an employee, only the recently set temporary schedule will be valid during the attendance calculation.
- iii. It is required to set the Timetable before selecting the date; otherwise, the modification will not take effect.

5.10.2 Import Temporary Schedule

Users can click **[Import]** to import the temporary schedule in batch for personnel. For detailed operation, please refer to <u>5."Import"</u>in Appendix 1.

5.10.3 Delete Temporary Schedule

Users can select the required schedule record to be deleted and click [Delete] or click 🔟 in the

same row of the personnel temporary schedule.

5.11 Schedule Preview

5.11.1 Schedule View

Schedule View shows a concise view of the schedules allocated to different employees.

Users can search the employees' schedules for a specific event like the employee's holidays, weekends, and employee schedule information. Also, users can add a shift to Employees, such as, add a temporary schedule for employees and clear the required shift.

1. Add Temporary Schedule

A temporary schedule complements the existing schedule. It is usually scheduled for overtime, such as overtime at night, overtime on weekends, overtime during holidays, and more.

- On the **Schedule View** interface, click on the drop-down list, situated on the left, to choose the required Department, Area, or Group.
- Please note, you can also use the Employee search option (search by Employee name or Employee ID) to search for the required Employees.
- On the opted Department, Area, or Group, select the required Employees from the list.
- Then, click on the corresponding date to select and right-click to add a temporary schedule to that date for the selected Employee.

5.12 Attendance Approval

Daily maintenance includes viewing the transaction logs and performing various operations on appended logs, leave and overtime.

5.12.1 Manual Log

When an employee leaves on a business trip or forgets to punch in or out, entering an attendance record to the attendance report manually is called adding a manual log. The manual logs are generally entered by the management personnel based on the attendance result and the attendance system of the enterprise after an attendance cycle ends.

• Select [Attendance] > [Approvals] > [Manual log] > [Add] to add a manual log for an employee.

dd					
Employee*	Ŧ	Auto Approved	Enable 🔵		
Punch Time*		Punch State*	Check In		V.
Work Code		Attachment	Choose File	No <mark>file ch</mark> osen	
Apply Reason					
	//				
				Confirm	Cance

Fill in the fields as shown below:

Employee: Enter employee ID or employee name to search and select the employee. Only one employee can be selected.

Auto Approved: If it is enabled then the manual log will be auto approved after submission.

Punch Time: Enter the punch time of the manual log.

Punch State: Select the punch state of the manual log from the drop-down list.

2

Work Code: Enter the work code of the employee.

Attachment: Upload the attachment for the manual log.

Apply Reason: Enter the apply reason for the manual log.

• Click [Confirm] to save the settings.

1. Bulk Add Manual Log

• Select [Attendance] > [Approvals] > [Manual log] > [Bulk Add] to add manual log for employees.

Depa	rtme 🔻	Department	-	C Employee	Se	lected 0

			/	4						

- Select the employees. The list on the right displays the selected employees. Set Punch Time, Punch State (check-in, check-out, break in, break out, overtime in, overtime out and so on) and reason for manual punch.
- Click [Confirm] to save the settings.

∕ ⊗Note:

Adding a manual log will simultaneously add an identical entry in the log table and modifying it will simultaneously modify the same entry in the log table.

2. Edit a Manual Log

Click the name of the person who needs to edit the record or click **[Confirm]** after modifications.

⊮×Note:

The approved record cannot be modified.

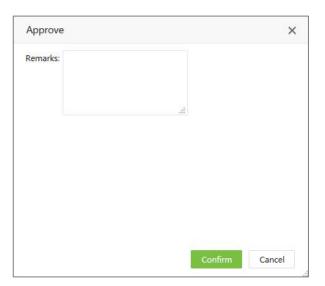

3. Delete a Manual Log

In the list of the manual log, select the manual log to be deleted and click [Delete] at the top left

of the list. Click **[Confirm]** or click 🔟 to delete the selected manual log.

4. Approve/Reject/Revoke a Manual Log

Select the applied log and click on **[Approve]**, **[Reject**] or **[Revoke**]. The approval window pops up as shown in the figure:

Enter Remarks and clicking [Confirm] will approve, reject, or revoke the manual log.

After the approval, the approval personnel will be displayed in each record, as shown in the figure.

			1		

- Select the employee, the list on the right side shows the selected employee. Select the start and end time of leave, pay code, and apply reason.
- Click [Confirm] to save the details.

*⊯*Note:

The time of the new overtime application is not included in the working hours of the staff.

3. Edit an Overtime Application

The editing procedure for overtime is the same as the manual log.

4. Delete an Overtime Application

The deleting procedure for overtime is the same as the manual log.

5. Approve an Overtime Application

The approval procedure for overtime is the same as the manual log.

6. Import Overtime Applications

Users can click **[Import]** to import the overtime applications in batch for personnel. For detailed operation, please refer to <u>5."Import</u> in **Appendix 1**.

5.12.4 Training

1. Add a Training Application

• Select [Attendance] > [Approvals] > [Training] > [Add] to apply for training.

Add		×
Employee*	×	Auto Approved Enable

5.13 Benefit Management

5.13.1 Leave Group

- 1. Add a Leave Group
 - Select [Attendance] > [Benefit Management] > [Leave Group] > [Add] to add a leave group.

Code*:	
couc .	
Name*:	

Enter the fields as shown below:

Code: Set the code of leave group.

Name: Set the name of leave group.

• Click [**Confirm**] to complete adding a leave group.

2. Edit Leave Group

Click the code of the leave group to be edited or click *if* to enter the edit page.

	9* 7		Name* Group 1			
Ad	d Benefit					
	Pay Code 🌲	Leave Type	Leave Applicati	Min Leave Day	Deduct Non-worki	
1	Annual Leave	Based On Service	1	1	0	0

Code: Cannot be edited.

Name: Edit the name of the leave group.

Add Benefit: Click it to add different leave types to the leave group.

Pay Code*		*			
Leave type*	Unlimited Leave	~			
Application Setting					
Leave Application is	1	Days	Min Leave Day*	1	Days
Allowed After Hired*			Whit Leave Day		ouys
Deduct Non-working	No	~			
Day*					

Pay Code: Select pay code whose type is leave from the drop-down list.

Leave Type: Set the leave type of the pay code. There are four leave types:

A. **Based On Service**: This calculation method supports leave types with leave quota increasing year by year, for example, the annual leave.

Leave type	* Based On Se	ervice 🔻			
Application Setting	Basic Setting	Entitlement Setting	Advance Setting		
Leave Application is Allowed After Hired		Days	Min Leave Day*	1	Days
Deduct Non-working Day		V			

(1) Application Setting

Leave Application is Allowed After Hired: Only after the employee joins the company for specific period, then only the employee can apply leave.

Example: If the setting is 90, it means the employee cannot apply for the leave until he or she has worked in the company for 90 days.

Min Leave Day: Set the minimum leave day that the employee needs to apply.

Deduct Non-working Day: The default setting is [No], which means the rest days and public holidays during the leave will not be counted as leave and the leave balance will not be deducted.

(2) Basic Setting

Leave type*	Based On Se	rvice 👻			
Application Setting	Basic Setting	Entitlement Setting	Advance Setting		
Leave Interval*	Year	v	Leave Distribution Time*	Cycle Start Date	Ŧ
Start Date*	0 <mark>1</mark> -01		Allow Exceed Limit*	No	Ŧ
Carry Forward to Next Year*	No	v	Max Forward Days	0	

Leave Interval: Now it only supports yearly, Yearly means distributing the annual quota to employees year by year.

Leave Distribution Time: Choosing [Cycle Start Date], means distributing the annual leave quota of the year on the first day of the year.

Choosing [**Cycle End Date**], means distributing the annual leave quota of the year on the last day of the year.

Start Date: Set the start date of the year. The system usually uses calendar year by default, e.g. January 1 of each year is the start time and December 31 is the end time.

Most companies calculate the annual leave based on calendar year. If your company has different cycle, you can make adjustment here.

Allow Exceed Limit: While the leave quota of the current year has been used up, whether employees are allowed to use the leave quota for the next year.

Carry Forward to Next Year: If you choose [**No**], it means the leave quota is available only in the year. The rest part of leave entitlement that employee did not apply will not be available in the next year anymore.

If you choose [Yes], it means the leave quota that employee did not apply for, can be transferred to the next year.

Max Forward Days: While [**Carry Forward to Next Year**] is set as [Yes], then users can set the Maximum Carry Forward Days. Such as set it as [5], it represents the leave balance that can be transferred to the next year should be no more than 5 days.

(3) Entitlement Setting

Application Setting	Basic Setting	Entitlement Setting	Advance Setting	
niority Start 🜲	Senio	rity End	Entitlement Days	
1	5		5	<u> </u>
5	6		6	

Click to add and set different entitlement days for different seniority. Example: There are two different seniority level.

- i. Set Seniority Start as 1 and Seniority End as 5, Entitlement Days as 5.
- ii. Set Seniority Start as 6 and Seniority End as 6, Entitlement Days as 6.

It means the employee is entitled to 5 days of annual leave from the first to the fifth year of employment. When it comes to sixth year, the employee is entitled 6 days of annual leave.

①Advance Setting

ng

Users can set the hire date of the employee as the start date of the year.

While Leave Distribution Time sets as "Cycle End Date", Set Hire Date as Year Start Date sets as "Yes", for example, the hire date of employee A is 2020-09-01, and the hire date of employee B is 2020-06-13. Employee A will get the leave quota for the first time on 2021-09-01, and B will get it on 2021-06-13; every year in the future, their leave quota will be automatically calculated based on their hire date.

Other calculation examples for leave type of Based On Service (Set Hire Date as Year Start Date sets as "No"):

i. The start date of the year is January 1, Set "Leave Distribution Time" as "**Cycle Start Date**", the leave quota for the first year of employment is 5 days.

If the employee's hire date is June 15th, then the employee will get leave quota of the first year **on June 15th** proportionally, the calculation formula shown as follows:

Leave Quota of The First Year = (Entry Time / 365) * 5

ii. The start date of the year is January 1, Set "Leave Distribution Time" as "**Cycle End Date**", the leave quota for the first year of employment is 5 days.

If the employee's hire date is June 15th, then the employee will get leave quota of the first year **on December 31st** proportionally, the calculation formula shown as follows:

Leave Quota of The First Year = (Entry Time / 365) * 5

②Unlimited Leave: The leave type without specific quota, such as no pay leave and work injury leave, etc.

Leave type*	Unlimited Leav	re 🔻			
pplication Setting					
Leave Application is Allowed After Hired*	1	Days	Min Leave Day*	1	Days
Deduct Non-working	No				
Day*					

Application Setting

Please refer to the parameter description of Based On Service Year.

③**One-Time Leave:** The leave type that the system will generate leave quota only for one time when the employee joined in the company. This calculation method is applicable for leave types such as maternity leave, marriage leave, paternity leave, compensation leave, etc.

Leave type*	One-Time Lea	ve 👻			
oplication Setting B	asic Setting				
Leave Application is Allowed After Hired*	1	Days	Min Leave Day*	1	Days
Deduct Non-working	No	Ŧ			

Application Setting

Please refer to the parameter description of Based On Service Year.

Application Setting Basic Setting	
Leave Entitlement* 1	

Basic Setting

Leave Entitlement: Set the leave entitlement for the one-time leave.

④ Fixed Quota: It is applicable for company's extra welfare leave, such as paid sick leave, birthday leave, company anniversary, etc. There is a fixed quota for every month/year.

Leave Type*	Fixed Quota	5				
plication Setting B	asic Setting					
Leave Application is	1	\$	Days	Min Leave Day*	1	Days
Allowed After Hired*						
Deduct Non-working	No		~			
Day*						

Application Setting

Please refer to the parameter description of Based on the Service Year.

Basic Setting

Leave Type*	Fixed Quota	v			
Application Setting B	asic Setting				
Leave Entitlement*	1				
Leave Interval*	Year	-	Leave Distribution Time*	Cycle Start Date	-
Start Date*	01-01		Allow Exceed Limit*	No	*

Leave Entitlement: Set the leave entitlement for leave type of fixed quota.

After adding different leave types to the leave group, click [**Confirm**] to complete the editing operation.

(5) Compensatory Leave: Compensatory leave can convert employees' overtime hours into leave hours.

Pay Code*	Compensatory Leave	Ŧ			
Leave Type*	Compensatory Leave	-			
oplication Setting Ba	asic Setting				
Leave Application is		Days	Min Compensate Hours	1.0	Hour(s)
		Days	Min Compensate Hours	1.0	Hour(s)
Leave Application is		Days	Min Compensate Hours	1.0	Hour(s)

Application Setting

Leave Application is Allowed After Hired: Only after the employee joins the company for specific period, then only the employee can apply leave.

Example: If the setting is 90, it means the employee cannot apply for the leave until he or she has worked in the company for 90 days.

Min Compensate Hours: Set the minimum duration of the compensatory leave.

Deduct Non-working Day: The default setting is [No], which means the rest days and public holidays during the leave will not be counted as leave and the leave balance will not be deducted.

				×
Pay Code*	Compensatory Leave	w		
Leave Type*	Compensatory Leave	v		
Application Setting B	asic Setting			
Leave Interval*	Year			
Carry Forward to Next Year*	No	-	Max Forward Hours	
(cal				

Basic Setting

Leave Interval: Now it only supports yearly, Yearly means distributing the annual quota to employees year by year.

Carry Forward to Next Year: If you choose [**No**], it means the leave quota is available only in the year. The rest part of leave entitlement that employee did not apply will not be available in the next year anymore.

If you choose [**Yes**], it means the leave quota that employee did not apply for, can be transferred to the next year.

Max Forward Hours: Users can specify the Maximum Carry Forward Hours while **[Carry Forward to Next Year]** is set to [Yes]. Set it to [5], which means the maximum amount of leave that can be transferred to the following year is 5 hours.

- 3. Assign Employee
 - Select corresponding leave group and click [Assign Employee].

Set the work hours range and assign to corresponding pay code.

• Advanced:

Add							×
Name*							
Basic Setting	Overtime Rule	Advanced					
Group		*	Department	 Ŧ			
						Confirm	Concol
						Connirm	Cancel

Department: Enter Department holidays. When the Department is not selected, the holiday is valid for all the Departments.

Group: Enter Group holidays. When the Group is not selected, the group is valid for all the Groups.

- Click [Confirm] to save the settings.
- 2. Edit a Holiday for Attendance

In the holiday list, click the name of a holiday, or click *i* in the same row of the holiday. Modify the parameters as needed and click **[Confirm]** to save the modifications.

3. Delete a Holiday for Attendance

In the holiday list, select the holiday and click [Delete] on the upper left of the holiday list or click

in the same row of the holiday to be deleted. Click **[Confirm]** to delete the holiday.

5.14 Attendance Report

The attendance report lists the attendance information of the queried employee within a designated time period and collects statistics on absence, late arrival/early leaving, overtime and leave, to check whether the listed information is consistent with the actual conditions. If the obtained result is inconsistent, adjust the shift, add an overtime sheet or compensatory leave sheet, or directly modify the data in the report based on the requirements.

Here attendance report is split into five types: Transaction Report, Daily Report, Weekly Report, Monthly Report and Summary Report.

- Set the Start Date and End Date. Please refer to <u>3."Date Selection"</u> in **Appendix 1** to set the date.
- Click , and view the attendance report of the selected employees between the start date and end date.

1. Transaction Report

Transaction

It provides all transaction information of the selected employee.

Time Card

It provides detailed punching information of the selected employee.

• First & Last

It provides statistics on the earliest and last punching data of each employee for each day.

First Punch: The earliest punch record of the day.

Last Punch: The last punch record of the day.

First In Last Out

It provides statistics on the earliest check-in and last check-out data of each employee for each day.

First Check-in: The earliest check-in record within the day's check-in time range.

Last Check-out: The last check-out record within the day's check-in time range.

2. Daily Report

Total Time Card

The total time card interface displays the statistics on the schedule, attendance status, overtime, and holidays of all staff by date. The attendance list is a statistical table of attendance records in each shift timetable.

Total Hrs.: Interval between the check-in time and the check-out time.

Total Hrs. of Break: Actual rest time (Break time-out/in).

Break Time: Break time.

Worked Hrs.: Actual working hours.

Duty Duration: Required working hours (timetable duration – Break time).

Total OT: Total overtime hours.

While checking the Total Time Card report, users can select the corresponding record and directly add either a manual log, leave or overtime applications and view the attendance settings for the employees via the pop-up menu list.

i. On the **Total Time Card** interface, select the corresponding record from the list, then right-click and select the required application type from the pop-up window.

Confirm	Cancel
	<i>01 huahua</i> 2020-12-01 00:00:0 Check In

Worked Hrs.

The list shows the calculation result of every pay code of the selected person.

Overtime Report

The list shows the overtime of the selected person.

Leave Report

The list shows the leave of the selected person.

Late In Report

The list shows the late arrival time of the selected person.

Early Out Report

The list shows the early leave time of the selected person.

Absent Report

The list shows the late arrival, early leave and absent of the selected person.

Exception Report

It provides all attendance exceptions.

Scheduled Log

This table calculates the valid schedules of attendance records.

Paired Punch

The list displays the consecutive check in and out of each Employee, and the total hours between each consecutive check -in/out.

Multiple Worked Hrs

When Multiple In/Out function is enabled in Flexible Timetable or the Paring Rule is set as Odd Even, the duration of each period and the total working time are counted.

Multiple Break Time

After Multiple In/Out is enabled in Break Time, the break time duration and total break time duration of each break period are counted.

Users can export an attendance report to a .xls, PDF, CSV or .txt file based on requirements. Please refer to <u>6. "Export"</u> in Appendix 1 to export the report.

Users can select the fields required for displaying in the attendance report based on requirements (the fields are displayed after being checked).

Users can change the column width by dragging the column border to the left or right based on requirements.

3. Weekly Report

• Weekly Worked Hrs.

The list displays the weekly work hours of the selected person.

Weekly Overtime

The list displays the weekly overtime of the selected person.

4. Monthly Report

Monthly Status

The monthly status interface displays the daily attendance status, attendance statistics, overtime statistics, leave records, and leave summary within a designated period. It uses symbols or digits or the combination of symbols and digits to represent different items. The meaning of each report symbol can vary in daily attendance.

Monthly Check-in/out

The monthly punch interface displays the daily check-in/out records of the selected person.

Monthly Worked Hrs.

The list shows the monthly working hours of the selected person.

Monthly Overtime

The list shows the monthly overtime of the selected person.

Monthly Absence

The list displays the selected person's monthly absence statistics.

5. Summary Report

Employee Attendance

The attendance summary interface displays the attendance summary of each employee in the time period, including the lists of attendance, leaves and overtime, namely the summary table of the attendance lists.

The leave records are calculated based on the leave type. The data in the left column is the sum of the data of all leave types. For example, leave = sick leave + casual leave + maternity leave + compassionate leave + annual leave + self-defined leave.

Employee Overtime

The overtime summary interface displays the overtime for each pay code whose type is overtime in the selected date range.

Employee Leave

The leave summary interface displays the leave time for each leave type in the selected date range.

Department Attendance

Displays all data for a particular Department. It is the statistics of all the employees' attendance in a Department.

Department Overtime

The department overtime summary interface displays the overtime time for each pay code whose type is overtime in the selected date range.

Group Attendance

Displays all the data for a particular Group. It is the statistics of all the employees' attendance in a group.

Group Overtime

The group overtime summary interface displays the overtime for each pay code whose type is overtime in the selected date range.

Leave Balance

The leave balance summary interface displays the detail leave balance information of selected person.

5.15 Configurations

5.15.1 Calculation

Select [Attendance] > [Configurations] > [Calculation] to calculate the attendance. It shows all the employees by default. You can select the Department on the right side to display the employees in

the specified Department. Fill the time range to be calculated. Click is to calculate. When the progress bar is 100% indicates the end of the calculation.

			100014	100014		2010 01 01	0	

1. Rules to select Check-in/out Time

While "Punch State Based" is not enable, the check-in time is the time that is the earliest within the check-in time range. For example, when you check-in at 8:50, 9:00 and 9:10, it is considered

that you check-in at 8:50. The check-out time is the time that is the latest within the check-out time range. For example, the due check-out time is 18:00, if you check out at 17:50, 18:00 and 18:20, it is taken that you check out at 18:20.

2. Calculation Process

First, determine the shift, work type on that day. Then select the check-in/out time and the leave list. Select the compensatory leave information. When selecting the work type, only the holiday settings of 100 days prior to the current day can be selected. Select the attendance parameters, calculate the attendance results, and save the results to the database.

3. Calculation Prerequisites

Calculation is only made when Enable Attendance Function is set to Yes. If the attendance calculation is not required for an employee, only the actual attendance value and the total time are shown in the report after the attendance calculation.

4. Work Type Consideration Rules

- If Calculation OT is selected, the overtime is calculated based on the settings of the attendance parameters. The calculation result is rounded based on the rounding rules. If the work time of the timetable is set to zero, it is considered that the timetable is overtime, which will be calculated as the daily overtime.
- If there is a temporary schedule, it is calculated by the work type of the temporary schedule.
- The work type on weekends and day-offs is considered as normal work or overtime work according to the value set in the attendance rule.
- The work type of holiday is determined as normal work or overtime work according to the value set on holiday.

5. Rounding Rules

- The rounding rules include rounding down, rounding off and rounding up:
- For rounding down, when the remainder of the calculated value exceeds the minimum unit, the system automatically truncates the remainder.
- For rounding off, when the remainder of the calculated value exceeds half of the minimum unit, the value will be increased by a minimum unit; if the remainder of the calculated value is less than half of the minimum unit, the remainder will be neglected.
- For rounding up, if the remainder of the calculated value exceeds the minimum unit, the value will be increased by a minimum unit.

6. Scheduling Principle

- When there is a normal schedule, the system considers the day as a workday. However, if there is a temporary schedule, the timetable of the additional temporary schedule is considered as work or overtime based on the preset value.
- When there is no existing schedule or temporary schedule assigned for the Employees, the

system will calculate the attendance according to the [Rule for Non-scheduled Days] function, which is configured either in [Global Rule], [Department Rule] or [Group Rule].

- If there is no existing schedule but a temporary schedule is arranged, it is considered as work or overtime based on the preset value in the temporary schedule.
- Determine whether there is an existing schedule:
 - i. Calculate the attendance based on a schedule if any, and check whether there is a temporary schedule. If yes, the work type of temporary schedule can be designated during temporary scheduling.
 - ii. If there is no schedule, check whether there is a temporary schedule.
 - iii. If there is no schedule or temporary schedule, attendance will get calculated according to [Rule for Non-scheduled Days] set on either [Global Rule], [Department Rule] or [Group Rule]
- iv. The attendance is not calculated when there is no attendance records.

5.15.2 Configuration

Select [Attendance] > [Configurations] > [Configuration] to set the report parameters.

Click [Confirm] to cancel the alarm of the selected device.

6.1.3 Set Parameter

Access Control Options	Duress Options An	iti-Passback Setu	p		
Door Lock Delay*	e	Da	or Sensor Delay*	15	
5 C	0 - 10 Second(s)	Do		1 - 255 Second(s)	
Door Sensor Type*	Normally Closed(NC)		Door Alarm Delay*	1	
				0 - 999 Second(s)	
NC Time Period*	0		No Time Period*	1/276.	
	Time Zone Number(0 - 50)			Time Zone Number(0 - 50)	
Retry Times to Alarm*	None	✓ Verify I	Mode by RS485*	Fingerprint/Card	w.
Valid Holidays	Yes		Speaker Alarm	Yes	

A. Select the respective device in the device list and click [Set Parameter].

Set the parameters as shown below:

1. Access Control Options

Door Lock Delay: Set the door lock delay for the device. The range is 0-10 second(s).

Door Sensor Delay: Set the door sensor delay for the device. The range is 1-255 second(s).

Door Sensor Type: Select the door sensor type for the device. The types are Normal Open (NO), Normal Close (NC) and None.

Door Alarm Delay: Set the door alarm delay for the device. The range is 0-999 second(s).

NC Time Period: Set the normal close time period number. The range is 0 to 50.

NO Time Period: Set the normal open time period number. The range is 0 to 50.

Retry Times To Alarm: When the number of failed verifications reaches the preset value (the value range is 1-9 times), an alarm will be triggered. If there is no preset value, an alarm will be triggered after a failed verification.

Verify Mode by RS485: Select the verification mode by RS485.

Valid Holiday: Select whether the NC Time Period or NO Time Period settings are valid in the preset holiday time period. Select NO to enable the NC or NO time period in the holiday.

Speaker Alarm: When it is enabled, the buzzer will raise an alarm when the device is dismantled.

2. Duress Options

Set Parameter				×

Yes
Yes
Yes 🔵
Yes
Yes 🔵
Yes

Set the following details:

Area: Select the area name from the areas list. It cannot be modified in the interface.

Time Period No.: Enter the time period number. The time period number is unique for each area.

Time Period Name: Enter the time period name.

Start Time/End time: Set the start and end time for each time period within a week.

Note: When the start time is greater than the end time, the following prompt will pop-up.

Confirm	×
End time is smaller than start tim the door can not be open for wh	
specific personnel, sure ?	
Confirm	n Cancel

If you click [Confirm], the door will not open for the specified employee for the entire day.

ON/OFF: The default is ON. Click OFF to disable the time period, the door cannot be open for the whole day for a specific employee.

2. Click [Confirm] to save the time period.

6.3.2 Edit Time Period

If you want to edit the time period, perform the following steps:

- Click the corresponding area on the left of the interface. The time period list of the corresponding area will be displayed.
- In the time period list, click the time period number or click *in the same row of the time* period to be edited.
- Modify the parameter settings based on the requirements (refer to the parameter setting method in "Add a Time Period"). Click **[Confirm]** to save the modified time period information.

6.3.3 Delete Time Period

- Click the corresponding area on the left of the interface. The time period list of the corresponding area will be displayed.
- In the time period list, select the time period and click [Delete] on the upper part of the interface

or click 🔟 in the same row of the time period to be deleted.

• Click [Confirm] to delete the selected time period.

⊮Note:

- a. The default time period cannot be deleted.
- b. The time period which is in use cannot be deleted.

6.3.4 Clone to Areas

1. Select the time period to be cloned. Click **[Clone To Areas]** at the top left of the time period list to open the following interface.

Clone I	o Areas		>
Area*:			
Remark:			
		Confirm	Cancel

Enter the parameters as shown below:

Area: Select the area (multiple choices are available).

Remark: Enter the remarks.

2. Click [Confirm] to save the clone details.

6.4 Holiday

The holiday settings can be configured to control the door access on holidays.

On holidays, special access control may be required. To facilitate this requirement, the access control time on holidays can be set which applies to all the employees of the corresponding area.

For each area, 24 holidays can be set by default.

6.4.1 Add a Holiday

1.	Select [Access Control] > [Access Control] > [Holiday]. Select the corresponding area from the
	area tree list on the left. Click [Add] to add a holiday.

Area*	A Area	v
Holiday Name*		*
Start Date *		
Duration *		
Time Period 1*		*

Enter the parameters as shown below:

Area: Select the area from the area list.

Holiday Name: Select the holiday name from the drop-down list. These holidays are added in the Attendance Module.

Start Date: It will be automatically filled after selecting the holiday name and cannot be modified later.

Duration: It will be automatically filled after selecting the holiday name and cannot be modified later.

Time Period 1: Enter the time period applicable to the holiday. The door opening time period depends on this parameter.

2. Click [Confirm] to save the holiday details.

6.4.2 Edit Holiday

If you want to change the holiday details in the corresponding area, perform the following steps:

- Click the corresponding area on the left side of the interface. It displays the holidays of the corresponding area on the right side of the interface.
- In the holiday list, click the holiday name or click \fbox in the same row of the holiday to be

edited.

• Modify the parameter settings as per your requirements (refer to the parameter setting method in "Add a Holiday"). Click [**Confirm**] to save the modified holiday information.

6.4.3 Delete Holiday

- Click the corresponding area on the left side of the interface. It displays the holidays of the corresponding area on the right side of the interface.
- Select the holiday and click [Delete] on the upper part of the interface or click in the same row of the holiday to be deleted.

Prompt		×
Are you sure to de	elete the selec	ted <mark>1 i</mark> tems?
	Confirm	Cancel

• Click [Confirm] to delete the selected holiday.

6.4.4 Clone to Areas

1. Select the areas to be cloned and click [Clone To Areas] at the top left of the holiday list.

Clone T	o Areas		×
Area*:		w	
Remark:			

Enter the details as shown below:

Area: Select the area (multiple choices are available).

Remark: Enter the remarks.

2. Click [Confirm] to save the details.

6.5 Group

The Group option enables you to manage the employees in groups.

The maximum number of groups in each area is 99. Group 1 is automatically created by default when the area is created, and it cannot be deleted. The newly added employees belong to group 1 by default.

6.5.1 Add New Group

A. Select [Access Control] > [Access Control] > [Groups] and the select corresponding area from the area tree list on the left side of the interface. Then click [Add] to add a new access group.

Area*	A Area	Ŧ
Group No.*		
Group Name*		
Time Period 1*		Ŧ
Time Period 2	1779-124-9	Ŧ
Time Period 3		×
Verification Mode*	Any	Ψ.
Include Holiday*	No	

Area: Select the area name.

Group No.: Enter a unique group number.

Group Name: Enter the name of the group.

Time Period: Set the time period of the group. Each group can have a maximum of 3 time periods. As long as one of them is valid, the group can be verified successfully.

Verification Mode: Set the verification mode of the group. When the group verification mode overlaps the user verification mode, then the user verification mode prevails.

Include Holiday: If it is set as [Yes], the door opening time period on holiday subjects to the time period set in holidays.

- B. Click [Confirm] to save the settings.
- 1. Edit Group

If you want to modify a group in the corresponding area, perform the following steps:

- Click the corresponding area on the left side of the interface. The list of all the groups in the corresponding area will be displayed on the right side of the interface.
- In the group list, click the group name or click *in* the same row of the group to be edited.
- Modify the parameters as per your requirements (refer to the parameter setting method in "Add New Group"). Click [Confirm] to save the modified group information.
- 2. Delete Group
 - Click the corresponding area on the left side of the interface. The list of all the groups in the corresponding area will be displayed on the right side of the interface.
 - Select the group to be deleted and click [Delete] on the upper part of the interface or click in the same row of the group to be deleted.

Prompt		×
Are you sure to de	lete the selec	ted <mark>1 ite</mark> ms?
1	Confirm	Cancel

• Click [Confirm] to delete the selected group.

⊯×Note:

- i. The default group cannot be deleted.
- ii. The group which is in use cannot be deleted.

6.5.2 Clone To Areas

• Select the group to be cloned and click [Group Menu] > [Clone To Areas] at the top left of the group list.

Clone T	o Areas		×
Area*:		w	
Remark:			

Enter the details as shown below:

Area: Select the area (multiple choices are available).

Remark: Enter the remarks.

• After entering the details, click [Confirm].

6.5.3 Personnel Transfer

• Select the group and click [Group Menu] > [Personnel Transfer] at the top left of the group list.

	11			Test			Tione.		
	987654323			Test					
	987654324	putes		Development					
		× < 1	> Total 4 F						

• Select the corresponding employee and click [Confirm] to add the selected person to the group. In the group list, click the corresponding group. The employees belonging to the group will be displayed on the right side of the employee's list.

6.5.4 Move To Group 1

This function is mainly used when you wish to delete the employee from other groups except Group 1.

Select the corresponding employee from the employee's list and then click [Move To Group 1].

6.6 Unlock Combination

Access groups can be used with different unlock combinations to enable multiple authentications and to improve security.

For each area, the maximum number of unlocking combinations is 10. When an area is created, 10 unlock combinations are automatically created. The unlock combination with combination NO. 1 will be set in a way that one employee from access-group 1 can open the door by default. Other unlock combinations do not include any employee from the access group.

8 Visitor Module (Optional)

Our **Visitor Management** module manages the mobility of people who enters the Organization, which benefits in tracking visitors who may be a customer/ client, a supply person, an interviewee, a service provider, and more. A visitor management system represents all the procedures and activities that an organization has set in place to handle visitor movement, from beginning to end, as part of the visitor interface.

Our **Visitor** module is integrated with Access Control Module, facilitates to control, record, and track visitors. The functional feature of this module includes entry registration, exit registration, visitor reservation and so on.

8.1 Registration

Our **Registration** module tracks down the visitor's primary details and other higher security requirements like Approval letter, legal documents, receiver details, and more.

On the Visitor module, click Registration to access the registration interface.

Entry Registration

The Entry Registration function allows reserving an appointment for visitors online.

On the **Registration** module, click **Entry Registration** to go to the Registration interface.

Columns displayed on the Entry Registration interface.

Visitor ID: Displays the identical number of the visitor.

First Name: Displays the first name of the visitor.

Last Name: Displays the last name of the visitor.

Certification Type: Displays the type of document submitted by the visitor for proof (e.g., Pan card, Driving License, Approval notes from the company, etc.).

Certification No: Displays the identical number of the proof document submitted by the visitor.

Status: Displays the status as "Entered" after successful registration.

Create Time: Displays the registration created time.

Exit Time: Displays the time exited by the visitor.

Email: Display the email address of the visitor.

Visit Department: Displays the area or the sector where the visitor visits.

Host/Visited: Displays the host's Employee ID, who escorts or meets the visitor.

Visit Reason: Displays the visitor's reason for visiting the Organization.

Carrying Goods: Displays the details of the belongings (like luggage, laptop, etc.) the visitor brings during the visit.

Visitor Quantity: Displays the total count of the visitors escorted with a host.

8.1.1 Register the Visitor Appointment

Add function lets you create an appointment for a visitor and registers the visitor information.

On the **Entry Registration** interface, click **Add** to create an appointment for a visitor and register the visitor details.

Add											×

2. Entry Information

On the Add window, click Entry Information tab, and then enter the following fields.

• Start Time: Click the Start Time field, and a small window pops up to select the required date, and then click Select Time on the same pop-up window to select the required time.

• End Time: Click the End Time field, and a small window pops up to select the required date, and then click Select Time on the same pop-up window to select the required time.

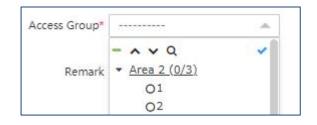

⊮Note:

The Start Time will be set as the current server time automatically and after the set valid period, the visitor will be automatically deleted from the corresponding devices.

- Visitor Quantity: Enter the total count of the visitors.
- Visit Department: On the Visit Department field, select the area or the department the visitor visits from the drop-down list.
- Host/Visited: On the Host/Visited field, select the host's Employee ID, who escorts or meets the visitor from the drop-down list.
- Access Group: Select the host's corresponding access area where the visitor can meet the host or the department area where the visitor can access.

Note:

The **Access Group** field will list out only those area(s) and the subareas of the selected host's corresponding access region.

- Visit Reason: Select the required visitor's reason for visiting the Organization from the drop-down list.
- Carrying Goods: Enter the details of the belongings (like luggage, laptop, etc.) the visitor brings during the visit.

After providing all the details, click **Confirm** to process the Registration and generate an appointment for the visitor.

8.1.2 Delete a Registration

Delete function deletes/ removes the created appointment of a visitor.

On the **Registration** interface, select the required created registration of a visitor from the list to delete.

After selecting the required registration of a visitor, click **Delete** to delete.

8.1.3 Exit a Visitor

Exit Registration function facilitates in ending the appointment of the visitor when the visitor is about to leave the premises.

Exit Registration	1				×
First Name	Anna		Last Name		
Certification Type	ID Card	Ŧ	Certification No.	45958720	
Visitor Quantity	1				
Exit Time*	2021-07-05 15:52:07		Carrying Goods		
				Confirm	Cancel

On the **Registration** module, click **Entry Registration**, and then select the required visitor from the list to exit the appointment.

After selecting the required visitor from the list, click **Exit Registration** to exit the appointment of the visitor.

∕ Note:

If the **Exit Registration** is not processed, then the system automatically exits the appointment and signs out from all the corresponding devices once the validity period of the visiting time expires.

8.2 Visitor

The **Visitor** interface displays the logs of all the visited people.

On the Registration module, click Visitor to go to the Visitor interface.

Columns displayed on the Visitor interface.

Visitor ID: Displays the identical number of the visitor.

First Name: Displays the first name of the visitor.

Last Name: Displays the last name of the visitor.

Certification Type: Displays the type of document submitted by the visitor for proof (e.g., Pan card, Driving License, Approval note from the company, etc.).

Certification No: Displays the identical number of the proof document submitted by the visitor.

Status: Displays the status ("Disabled 🧧 "or "Enabled 🧖 ") of the visitor information.

Create Time: Displays the registration created time.

Exit Time: Displays the time exited by the visitor.

8.2.1 Disable a Visitor

The **Disable** function limits the visitor's access to the premises and contains the visitor details in the disabled state.

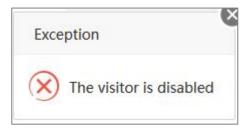

Prompt		×
Are you sur	e to disable	this visitor?
	Confirm	Cancel

On the Visitor interface, select the required visitor information from the list, and click Disable to set to

the disabled state.

On the prompt window, click **Confirm** to disable the visitor and the specific visitor status will display in Disable \bigcirc state.

So, if you are trying to make a registration for the disabled visitor detail, the below prompt will pop up and ensures creating registration or generating the appointment for that visitor.

8.2.2 Enable

The **Enable** function enables the visitor details to the enable state and facilitates the visitor's access to the premises.

Prompt		×
Are you su	re to enable	this visitor?

On the **Visitor** interface, select the required visitor information from the list, and click **Enable** to set to the enabled state.

On the prompt window, click **Confirm** to enable the visitor and the specific visitor status will display in Enable state.

8.3 Reserve an Appointment

The **Reservation** module facilitates managing reservations for visits.

On the **Visitor** module, click **Reservation** > **Reservation** to manage reservations.

	2021-07-05 15:55:18	*			~

On the Add window, enter the following fields.

- 1. Visitor Information
 - First Name: Enter the first name of the visitor.
 - Last Name: Enter the last name of the visitor.
 - Certification Type: Select the type of document submitted by the visitor for proof (e.g., Pan card, Driving License, Approval note from the company, etc.) from the drop-down list.
 - Certification No.: Enter the identical number of the proof document submitted by the visitor.
 - Gender: Select the gender of the visitor from the drop-down list.
 - Company: Enter the company details of the visitor working for.
 - Auto-Approved: If it is enabled, then the reservation will be auto-approved after submission.

2. Entry Information

On the Add window, click Entry Information tab, and then enter the following fields.

- Visit Reason: Select the required visitor's reason for visiting the Organization from the drop-down list.
- Visitor Quantity: Enter the total count of the visitors.

- Visit Department: On the Visit Department field, select the area or the department the visitor visits from the drop-down list.
- Employee: On the Employee field, select the host's Employee ID, who escorts or meets the visitor from the drop-down list.
- Visit Date: Click the Visit Date field, and a small window pops up to select the required date, and then click Select Time on the same pop-up window to select the required time.
- Email: Enter the email of the visitor.

After providing all the details, click **Confirm** to generate a reservation for the visitor.

∕ Note:

The personnel can make reservation for themselves by "Self-Service Login". The process is the same as the above specified steps.

8.3.2 QR Code

The QR code function facilitates the visitors to create reservation by themselves. The visitors can scan the QR Code generated by the software to create reservation.

Note:

Admins can generate the QR Code and send to the required visitor through mail to create reservation.

On the **Reservation** interface, click **QR code** to generate QR code in order to create reservation.

On the **QR Code** window, click **Download** to download the generated QR Code and save it to the required location.

After downloading the QR Code, click **Refresh** to create another or click **Confirm** to complete the process.

The Admin can then send the downloaded QR Code to the required visitor to create reservation.

The visitors may scan the QR code and the following ZKBio Time.0 interface will be displayed.

Visitor Information	-	
Certification Type *		~
Certification No. *		
First Name		
Last Name		
Gender		v
Company		
Entry Information		
Visit Date *	2022-05-05 09:00:00	

On the interface, enter the following fields, and click **Submit** to complete the <u>reservation process</u>.

The submitted reservation will reflect on the software and the Admin can view the created reservation details.

8.3.3 Approve/ Reject/ Revoke a Reservation

Approve function lets you approve the created reservation request.

Please notice that only the System Admin and the Users included in Approval workflow can approve the reservation.

On the **Reservation** interface, select corresponding reservation record, and click either **Approve**, **Revoke**, or **Reject** to approve, revoke, or reject the reservation application.

On the Pop-up window, provide the required comments, and then click **Confirm** to update the application status.

∕ Note:

Once the reservation is approved, the admin needs to create the Entry Registration for that specific visitor. And while creating entry registration for the visitor, the admin can simply enter the Cert. Type and Cert. NO., and the other reservation information will be automatically updated.

8.3.4 Delete a Reservation

Delete function let you delete a created reservation information.

On the **Reservation** interface, select the required reservation record from the list and click **Delete** to delete the reservation.

Prompt		×
Are you sure to d	elete the selec	ted <mark>1 it</mark> ems?
	Confirm	Cancel

On the prompt window, click **Confirm** to delete the selected reservation record.

8.4 Configuration

Our **Configuration** module of ZKBio Time.0 facilitates you to accomplish in managing the new or the existing visitor details and in the maintenance of the data, which eases your work in preserving the information of the visitors.

On the Visitor module, click Configuration to access the configuration interface.

8.4.1 Parameter Setting

The **Parameter Setting** interface facilitates the users to set the approval policy for the QR Code, and to set the identity number for the visitors.

On the **Configuration** interface, click **Parameter Setting** to set the required parameters.

9 Meeting Module

Our ZKBio Time software eases the process of planning and booking a meeting from hassle to harmony between teams by managing the meeting requests, providing access to only the required attendees, schedule, agenda, and other related actions. Our software also facilitates in generating the automatic access for the next applicable Attendees to their allocated Meeting Rooms as per the scheduled time slot.

9.1 Setting up the Meeting Room

Our **Room** interface eases for arranging meetings and event planning, helping allocate space and resources for upcoming events and meetings.

On the **Meeting** module, click **Room** > **Room** to set the Device to the required Meeting Room.

Columns displayed on the Meeting Audit interface

Name: Displays the title of the Meeting purpose.

Topic: Displays the topic of the meeting, if specified.

Meeting Date: Displays the meeting Date.

Time Zone: Display the time zone of the meeting time.

Meeting Period: Displays the duration of the meeting.

Attendee: Displays the count of the meeting attendees according to the selected meeting room capacity.

For Example: If the selected room capacity is 9, and the total attendees are 8 then it displays "8/9".

Meeting Room: Displays the scheduled meeting room name.

Purpose: Displays the purpose of the meeting.

Start Host: Click 🝳 to start the Zoom online meeting.

Share Link: Click Copy Invitation to copy the registration link of the online meeting and then share it to the attender to join the meeting.

Applicant: Displays the Personnel ID of the applicant who raised the meeting schedule request.

Approval Status: Displays the status (Approved/Revoke/Rejected) of the meeting schedule request.

Approver: Displays the name of the approver who approves, revokes or rejects the meeting schedule request.

Approval Comment: Displays the approver's comment/remarks, if specified.

9.2.1 Create a Meeting Schedule

Add function lets you create a Meeting Schedule.

r	Name*			Topic*		Online Meeting	Enable 🔵	
Start	Time*			End Time*		TimeZone*	ETC/GMT+8	Ŧ
App	licant*		Ŧ	Purpose*		Auto Approved	Enable 🔵

)	room1		20	21				
)	test		22	test				
)	23		23	32				
	1	jump to 1	Page Co	nfirm Total 3 Records 10	records per page 🗸			

On the Meeting interface, click Add to create a meeting schedule.

On the Add window, enter the following fields.

- Name: Enter the identical number of the meeting room.
- Topic: Enter the topic of the meeting.
- Online Meeting: After enabling it, users will be able to set up the zoom online meeting.
- Start Time: Enter the meeting Start Time.
- End Time: Enter the meeting End Time.

∕≤Note:

To select the Date and Time, click the **Start/End** Time field, and a small window pops up to select the required date, and then click **Select Time** on the same pop-up window to select the

required time.

- Time Zone: Enter the time zone of the meeting time.
- Applicant: Enter the applicant of the meeting.
- Purpose: Enter the purpose of the meeting.
- Auto-Approved: If it is enabled, the meeting schedule will be auto-approved after submitted.

Select the Meeting Room.

On the Add window, click Meeting Room tab to select the required meeting room.

Vi	ew Date*	2021-06-04			
	Name	Capacity	Location	Been Used	
)	room1	20	21	00:00:00~01:00:00,01:01:00~02:00:00	
)	test	22	test		
0	23	23	32	16:00:00~18:00:00	

On the **Meeting Room** tab, click the **View Date** field, and a small window pops up to select the required date, and then click **Select Time** on the same pop-up window to select the required time.

Once the required date is selected, the corresponding Meeting Room list will get updated to that specified date and will display all the available and occupied meeting rooms.

Columns displayed on the Meeting Room List.

- Name: Displays the meeting room name.
- Capacity: Displays the total capacity of the meeting room.
- Location: Displays the meeting room location.
- Been Used: If the meeting room is occupied, the scheduled meeting period will be displayed; but if the meeting room is available, the field will be left blank.

Based on the available list, the user can select the required meeting room for that specific date.

Set up Online Meeting

Waiting Room	Disable		Join Before Host 🔵 No	9
Auto Recording*	Disabled	Ŧ	Mute Upon Entry	
Start Host Video	No		Start Participant Video 🔵 No	0

- Waiting Room: Enable it, then the attender will be in the waiting room unless the host join the meeting.
- Join Before Host: Allow participants to join the meeting before the host starts the meeting.

∕ ⊗Note:

If waiting room is enabled, the join before host setting will be disabled.

• Auto Recording: Users can set whether to record the meeting automatically. If yes, then users can save the record to local or in the cloud.

Disabled	
Disabled	
Save to local	
Save to cloud	

- **Mute Upon Entry**: If it is enabled, then the attenders will be muted by default when they join the meeting.
- Start Host/Participant Video: If it is enabled, then it will start video when the host/participant joins the meeting.

Select the Attendee

On the Add window, click Attendee tab to select the required Employees/attenders for the meeting.

De	partme 👻	Department	~ Q	Employee	Selected 0
	Employee ID	First Name	Last Name	Department	Employee ID* First Name* Last Name* Department
	001			lala	None

- On the **Meeting** interface, select the required meeting schedule from the list to calculate the attendance.
- Click **Calculation** to calculate the attendance, and then click **Confirm** to proceed the calculation process and to update the meeting attendance reports to the latest information.

9.3 Update Attendance Manually

Our **Manual Log** interface facilitates in updating the Employee's missed out <u>meeting room access</u> records manually. That is, the missed check-in/out details can be requested via the Manual Log interface if the Employee forgets to check-in/out when accessing the meeting room.

Admin can create a manual log request for the corresponding Employee, and the Employees can also create by logging in to the self-service application to apply for manual attendance request.

On the **Meeting** module, click **Meeting** > **Manual Log** to access the Manual Log interface.

- On the **Manual Log** interface, click **Add** to create a manual attendance request for a specific Employee.
- On the Add interface, select the required Employees from the list on the left.
- The selected Employees will be reflected on the right side of the corresponding Employee List.
- Use the **Department** drop-down list or the **Search** function (search by Employee) to search for Employees.
- Once the required Employees are selected set the other parameters.

On the Add window, enter the following fields.

- Meeting: Select the required meeting name from the drop-down list.
- Auto Approved: If it is enabled, then the manual log will be auto approved after submission.
- **Punch Time:** Click the **Punch Time** field, and a small window pops up to select the required date, and then click **Select Time** on the same pop-up window to select the required time.
- **Punch State:** Select the required check-in/out status from the drop-down list.
- **Reason:** Enter the reason for missed check-in/out request.

After providing all the details, click **Confirm** to save and update the request.

Edit a Request

- On the **Manual Log** interface, select the required meeting schedule name corresponding to that Employee name from the list to edit.
- On the Edit window, edit the required changes, and then click **Confirm** to save and update the changes.
- Please notice that the approved request cannot be modified.

9.3.2 To Delete a Manual Log Request

Delete function let you delete the required Manual Log request from the list.

Columns displayed on the Meeting Room Scheduled interface

Meeting Name: Displays the name of the scheduled meeting.

Meeting Date: Displays the date of the scheduled meeting.

Meeting Period: Displays the meeting time period.

Duration: Displays the total duration of the meeting.

Employee ID: Displays the Personnel ID, which is meeting attendee's identical number.

First Name: Displays the Personnel ID (meeting attendee) first name.

Last Name: Displays the Personnel ID (meeting attendee) last name.

Clock In: Displays the Personnel (attendee) check-in time to that meeting.

Clock Out: Displays the Personnel (attendee) check-out time to that meeting.

Attended Duration: Displays the Personnel (attendee) attended duration to that meeting.

Late In: Displays the late-in time if the Personnel (attendee) attended late to that meeting.

Early Out: Displays the early-out time if the Personnel (attendee) left early from that meeting.

Absence: Displays the absence time if the Personnel (attendee) left either in between the meeting or did not check-in/out the meeting room or did not attend the meeting.

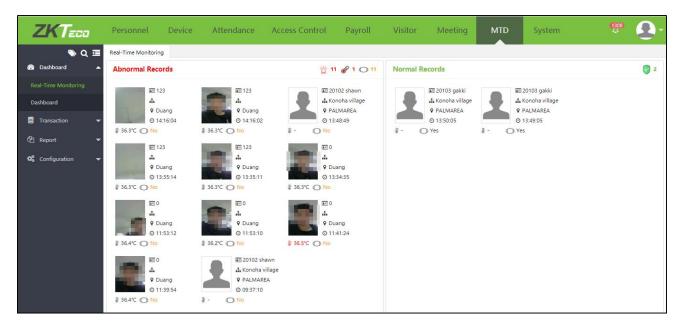

10 MTD Module

Our MTD module eases to work with the access control devices that come up with body temperature detection and mask detection features. It provides real-time monitoring of temperature and mask detection of all the users and provides various analysis reports.

Suppose if a person is detected with a higher body temperature status or detects without wearing a mask, the superuser or the user who has permission to access the department to which the recognized person belongs can send an email notification to that person himself. And if the person has access to Mobile APP, where the notification status is enabled, a message is sent to his corresponding personnel mobile application account to notify those particular personnel.

10.1 Real-Time Monitoring

On the **MTD** module, click **Dashboard > Real-Time Monitoring** to view the mask and temperature detection status details of the Employees.

- The Real-Time Monitoring interface monitors the body temperature of the users with their images captured during verification.
- The mask and temperature data of a person gets collected only if the specific personnel registered in the device.
- And, if the personnel is detected with high body temperature or without wearing a mask, the detailed information of the abnormality details will be displayed on the Abnormal Records list, otherwise on the Normal Records list.

Real-Time Monitoring Features

- Abnormal Records: Displays the list of personnel with normal temperature.
- Normal Records: Displays the list of Personnel with abnormal temperature.
- Other Indications:

宣	Displays the total count of personnel detected with abnormal body temperature and without a mask.
ð	Displays the total count of personnel detected with abnormal body temperature.
\bigcirc	Displays the total count of personnel detected without a mask.
0	Displays the total count of personnel detected with normal body temperature.

10.2 Dashboard

On the **MTD** module, click **Dashboard > Dashboard** to view the daily and monthly statics of the Personnel's mask and temperature detection status.

The following are the different categories of statics displayed on the Dashboard interface.

- 1. Daily Status: Display the daily statistics of the Personnel count in the following categories.
 - Personnel who have high or abnormal temperature.
 - Personnel who are detected without mask.
 - Personnel who did not get detected with temperature and mask.

- And the personnel detected with mask and normal body temperature.
- 2. **Department Summary:** Display the daily statistics of the Personnel count by the department wise in the following categories.
 - Personnel who have high or abnormal temperature in that department.
 - Personnel who are detected without mask in that department.
 - And the Personnel who did not get detected with temperature and mask in that department.
 - •Other Formats and Operations: The following formats facilitates to view the report data in different forms.

È	Click to view the department summary in report format.
<u>1.</u>	Click to view the department summary in line format.
<u>000</u>	Click to view the department summary in clustered column format.
Ŵ	Click to view the department summary in stack format.
C	Click to refresh the department summary data.
玉	Click to download the department summary report.

- 3. Monthly Temperature: Displays the monthly statistics of the Personnel temperature.
- 4. **Monthly Exception:** Displays the monthly statistics of the Personnel's exceptional or abnormal temperature.

5. Status Indications:

-	Indicates the statistics of the Personnel with high or abnormal temperature.
-	Indicates the statistics of the Personnel detected without mask.
	Indicates the statistics of the Personnel who did not get detected with temperature and mask.
	Indicates the statistics of the Personnel with normal temperature.

10.3 Transaction

This function displays the transaction details uploaded from the MTD device. If the detected body temperature exceeds the threshold temperature value set on the software, then its temperature value will get updated in red.

On the MTD module, click Transaction > Transaction to view the MTD transaction details.

Columns displayed on the Transaction interface

Employee ID: Displays the Personnel's unique identity number.

First Name: Displays the first name of the Personnel.

Last Name: Displays the last name of the Personnel.

Department: Displays the department to which the recognized Personnel belongs to.

Position: Displays the designation of the recognized Personnel.

Check Date: Displays the MTD detected date of the Personnel.

Check Time: Displays the MTD detected time of the Personnel.

Temperature: Displays the detected temperature value of the Personnel and if the temperature is not detected, then the column will be left blank.

Upload Photo: Displays the recognized image of the Personnel.

With Mask: Displays True if the mask is detected and False if the mask is not detected.

SN: Displays the serial number of the Device.

Device Name: Displays the Device name.

Area: Displays the Device Area.

Data Source: Displays the source through which the MTD was detected.

Upload Time: Displays the uploaded time of the MTD data.

10.4 Report

The ZKBio Time MTD Report provides a consolidated, factual, and up-to-date details of the Personnel temperature and mask status.

The following are the different types of MTD reports.

- Daily Detail
- Department Summary
- Abnormal Detail

On the MTD module, click Report to view the MTD data of the Personnel.

Daily Detail

The **Daily Detail** report displays the up to date detected body temperature detail of the selected personnel.

On the **MTD** module, click **Report** > **Daily Detail** to view the MTD data of the Personnel.

10.5 Configuration

Our **Configuration** module of MTD interface facilitates you in managing the Personnel MTD data, which eases your work and benefits in delivering up to date details of all the Personnel MTD data.

ZKTeco	Personnel	Device	Attendance	Access Control	Payroll	Visitor	Meeting	MTD	System	۵	•
🏷 Q 🗉	Real-Time Monitorir	ng × Setup	×								
🙆 Dashboard 🛛 🔻	Temperature Setting	g									
🛢 Transaction 🔻											
🛱 Report 👻	Temperature Warnin	ig* 37		Temperature Unit* C							
📽 Configuration 🔺	at all a marked										
	Alert Setting										
	Temperature Ala	rm Yes		Mask Alarm Yes	D						
	Submit										

Temperature Setting

This function facilitates to set the value for abnormal temperature. So, if a Personnel gets detected with the set warning temperature, then the Personnel's body temperature will get updated as abnormal temperature.

- Temperature Warning: Enter the value for abnormal temperature.
- Temperature Unit: Enter the unit of the temperature in °C or °F.

Alert Setting

This function facilitates to set the alarm if a Personnel is detected with high temperature and without a mask.

- Temperature Alarm: Toggle to enable or disable the Temperature alarm function.
- Mask Alarm: Toggle to enable or disable the Mask alarm function.

Once enabled and a Personnel is detected with a higher body temperature or does not wear a mask, an email notification will be sent to the person himself by the system superuser and the user who has permission to access the department to which the person belongs. And if the personnel's APP status is enabled, the software will also push notification to the corresponding personnel APP account.

And the email notification is in real-time. So, once there is an abnormal situation, an email notification will get automatically sent to the corresponding Personnel account.

Example:

As shown below, a Personnel named Andy belongs to the Test Department, where the APP status has been enabled for him and updated with an email account.

11 System Settings

The system setting facilitates you to assign system users (such as Company Management Personnel, Registrars, and Statistics Clerk), configure roles for each user, and set mailbox function, automatic export, backup, data migration, operation logs, etc.

11.1 System User Management

11.1.1 Privilege Group Management

While using the system, the superuser needs to assign different levels to new users. To avoid assigning one by one, you can set roles with specific levels in role management. You can also assign appropriate roles to users while adding users. The permissions are configured for all the functional modules namely Personnel, Device, Attendance, Payroll, Access, and System. The default super users of the system have all the privileges and can assign new users based on the requirements and they can set the corresponding permissions.

- 1. Add a Privilege Group
 - Select [System] > [User] > [Group].

Add							×
*Name							
Personnel Device Attendance	Payroll	Access	Visitor	Meeting	MTD	System	
✓						Confirm	Cancel

∕≤Note:

Select the corresponding permissions based on the selected functional module.

Name: Enter the name of the role (e.g.: Employee, Device Administrator, etc).

Permissions: In the permission list under each functional module, select the checkboxes of the required permissions. If you want to select all the permissions under a module, select the Master check box.

• Click [Confirm] to save the settings.

- 2. Edit a Privilege Group
 - •In the privilege group list, click the role name or click *in the same row of the role to be edited.*
 - Modify the parameters as per your requirements (refer to the parameter setting method in "Adding a role"). After modifications, click [Confirm] to save the parameters.
- 3. Delete a Privilege Group
 - In the privilege group list, select the privileged group and click [Delete] on the upper part of the

Prompt	
Are you sure to delete the sel	ected 1 items
Are you sure to delete the sel	ected <mark>1 ite</mark> ms

interface or click 💼 in the same row of the role to be deleted.

• Click [Confirm] to delete the selected privilege group.

SNote: The group which is currently being used cannot be deleted.

11.1.2 User Management

Adds new users to the system and assigns the role (permissions) to users.

- A. Add a User
 - Select [System] > [User] > [Add] to access the Add User interface:

FP Qty. v10 0 Enroll
Superuser No
Authorized Area
Confirm Cancel

• Enter the parameters as shown below:

Username: Enter the Username of maximum 30 alphanumeric characters. Supports letters, digits and @/./+/-/_ only.

Password/ Password Confirmation: Enter the Password. Re-enter the password to confirm the same.

First Name/Last Name: Enter the First Name and the Last Name of the user.

Email: Enter the user's Email address.

FP Qty.: Enroll fingerprint for the user.

Enable: If selected, the user can log into this admin site.

Superuser: If selected, the user has all the rights and there is no need to assign permissions.

Groups: Roles need to be selected for non-superusers. Select a preset role, and the user has all the operational permissions of this role.

Authorize Department: Click and select a Department from the Department drop-down list. (If the Department is not selected, the user possesses rights for all the Departments)

Authorize Area: Click and select an area from the area drop-down list. (If you select no area, you will possess all area rights by default.)

• After editing the user details, click [Confirm] to save them.

∕≪Note:

You can delete the existing users. Click the **[Delete]** at the top of the user list. The detailed operations are the same as those in "Deleting a permission group."

- B. Change Password
 - Select [System] > [User] > [Change Password] to change the password.

Change Password		×
Original Password*

11.2 Data Management

11.2.1 Database Backup

You can back up the data to prevent data loss. The software can be set to back up the database automatically or manually. And it also supports to restore the PostgreSQL database.

ZKTECO	Personnel De	vice Attendan	ice Access C	Control Payroll	Visitor Meeting	System			0 <mark>0</mark>	<u>.</u> -

A. Backup Automatically

1. Select [System] > [Database] > [Backup Automatically] to back up the data manually.

Database*	PostgreSQL	~		
Database Name*	biotime			
Storage Path*				
Frequency*	Monthly			
Day*	1	~	Time* 01:00	
Backup photos				
Backup photos				

Database: Database type cannot be modified.

Database Name: Database name cannot be modified.

Storage Path: Set the storage path. A corresponding folder will be created to store the original backup files.

Frequency: Enter the repetition interval for the backup files.

Day and Time: Enter the Day and Time for backup.

Backup photos: Select whether to backup photos (including personnel photos, bio-photos, and attendance photos).

- 2. After setting the backup parameters, click [Confirm].
- B. Backup Manually
 - Select [System] > [Database] > [Backup Manually] to back up the database manually. Enter the storage path and select whether to backup photos (including user photo, bio-photo, and attendance photo).

Backup Manually	×
Storage Path*	
Confirm	Cancel

2. After setting the storage path, click [Confirm].

- C. Restore Manually (Only PostgreSQL)
 - 1. Select [System] > [Database] > [Restore Manually] to restore the Database.

Restore Manually	'	×
Database Name*		
Backup File* Restore photos	~	
	_	Cancel

Database Name: Enter the database name.

Backup File: Enter the backup file which has to be restored.

Restore photos: Check it to restore the photos already backup.

- 2. After setting the details, click [Confirm] to restore the file manually.
- D. Download Backup File to Client

This function facilitates preventing data loss when there is an exception occurs on the server. Click the corresponding store path on the database backup list to download the backup database file from the server to the client.

Export Path	t{work_code}card_numbe Data Filter Setting E	er)area_name)\t{termin :xport Time Setting Ema	hal_alias)\t(terminal_sn)\ Export Path Setting		<u>/</u>

Macros: Select and drag the fields that you want to export to the text box Data Template below.

Name: Enter the name of auto export task.

Auto Export: Enable it, then the auto export task will be valid, and exports the file to the corresponding path according to the set frequency.

File Name: Enter the file name to be exported.

File Format: Set the file format of the exported file (Excel, CSV, Txt).

Data Template: Select the fields to export from the menu Macros above. By default, all the data will be auto exported.

• Format Setting

Format Setting	Data Filter S	etting Export	Time Setting Ex	port Path Setting	
Employee ID*	0	Digit			
Punch Date*	уууу-MM-DD	*	Punch Time*	HH:mm:ss	Ŧ
Current Date	yyyyMMDD	Ŧ	Current Time	HHmmss	Ŧ

Employee ID: Set the length of the Employee ID when exporting. If the length is insufficient, 0 will be appended to the Employee ID.

Punch Date/Time: Set the time format in the punch date/time.

Current Date/Time: Set the time format in the current date/time.

Data Filter Setting

Format Setting	Data Filter Setting	Export Time Setting	Export Path Setting		
Filter By*	Flag	*			
Department		w.	Area	~	

Filter By: Set the filter for the attendance transactions to be uploaded on the software. The filter can be:

Flag: The status whether the attendance transactions have been uploaded. In the database, if the flag is 1 means the attendance transaction has been uploaded and if the flag is 0 it means the attendance transaction has not been uploaded.

Upload Time: Represent the time when the attendance transaction is uploaded to the software.

Punch Time: Represent the time when the user punches.

Department: Click to select the Department to export. If the Department is not selected, the attendance data of all the departments will be auto exported.

Area: Click \leq to select the area to export. If the area is not selected, the attendance data of all the areas will be exported.

• Export Time Setting

Format Settings	Data Filter Settings	Export Time Settings	Export Path Settings	
Export Policy*	By Timing			
Frequency*	Daily	The second secon	* 1 *	
Export Time*	00:01 HH	t:mm Export Period	g* Natural Period	
			Unnatural Period	
			Natrual Period	Confirm Cancel

Export Policy: Set the export frequency policy. It can be set as By Timing or By Interval. While Export Policy sets as "**By Timing**", users can set:

Frequency: Set the export frequency. The export time-frequency can be set on a monthly/weekly/daily basis. According to the selected frequency, set the date and time.

Time Point: Set the export time point.

Period: Select the period within which the transactions are. It can be set as "Natural Period" and "Unnatural Period". While it sets as "Natural Period", the exported transactions will be the ones within the natural period. Examples:

Example 1:

Today is 2021-01-01, Friday, set the start of week as Monday. Period set as "Natural Period".

- Set Frequency as "Daily", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range: 2020/12/31 00:00 AM <= Period < 2021/01/01 00:00 AM
- II. Set Frequency as "Weekly", Day as "Friday", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range:

2020/12/21 Mon. 00:00 AM <= Period < 2020/12/28 Mon.00:00 AM

III. Set Frequency as "Monthly", Day as "1", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range:

2020/12/1 00:00 AM <= Period < 2021/01/01 00:00 AM

Example 2:

Today is 2021-01-01, Friday, set the start of week as Monday. Period set as "Unnatural Period".

IV. Set Frequency as "Daily", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range:

2020/12/31 9:00 AM <= Period < 2021/01/01 9:00 AM

V. Set Frequency as "Weekly", Day as "Friday", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range:

2020/12/25 Fri. 9:00 AM <= Period < 2021/01/01 Fri. 9:00 AM

VI. Set Frequency as "Monthly", Day as "1", Export Time as 9:00 AM. Then at 9:00 AM of 2021-01-01, Friday, the software will export attendance transaction within the time range:

2020/12/1 9:00 AM <= Period < 2021/01/01 9:00 AM

While Export Policy sets as "By Interval", show as following figure:

Format Settings	Data Filter Settings	Export Time Settings	Export Path Settings
Export Policy*	By Interval	v	
Interval*	0	inutes	

Interval: Set the export interval for the export task.

Export Path Setting

ormat Setting	Data Filter Setting	Export Time Setting	Export Path Setting
Export Path			Email
FTP Server		▼ FTP	' Path

Export Path: After entering the file name, a new folder will be created in **\files\temp** of the installation directory of the local computer to store all the exported files.

Email: When an Email is set, it receives the exported file when it is exported.

FTP Path: Set the name of the folder, which is the existing folder on the FTP server. The exported files will be saved in the corresponding folder under the FTP server in the file format of "/ABC/" (ABC is the existing folder on the FTP server).

FTP Server: Click to select the FTP server. When the attendance record is exported, the exported file will be saved on the FTP server.

- 2. After setting the export details, click [Save].
- B. Manual Export

After the automatic export settings are saved, you can export the attendance records in real-time by clicking [Manual Export] at the top of the list.

1. Select the set automatic export and click [Manual Export] to export the data manually.

Start Date*		
End Date*		
Query By*	Upload Time	~

Start Date/End Date: Set the export period.

Query By: Select Upload time if you want to search by the time when the attendance data is

uploaded to the software. Select **Punch time** if you want to search by the time when the user punches. Select **Flag** if you want to search by the status by checking whether the transaction has been exported before.

- 2. After entering the details, click [Confirm] to export the attendance records.
- C. Delete Auto Export Template

In the auto export template, select the template and click [Delete] at the top of the template list, or

click in the same row of the template.

Click [Confirm] to delete the selected template.

11.3.2 Auto Attendance Export

Based on the set time and the set reiteration period, the attendance reports will get exported automatically.

11.6 Configuration Settings

11.6.1 System Setting

A. Company Setting

The Company Setting interface facilitates to upload and modify the company logo and the company name. This company logo can be displayed in the exported report.

Users can upload a picture and crop it as a company logo, the dimensions of the cropped image will be 200 x 75, which is the suitable size for displaying on the exported file.

• Click [System] > [Configuration] > [System Setting]> [Company Setting] to access the Company Setting interface.

11.6.2 Email Template

On the **System** module, click **[Configuration]** > **[Email Template]** to set the email template.

Users can draft the corresponding email templates for different events, such as attendance/visitor/meeting approvals, attendance exceptions and so on.

Receiver: On the Receiver tab, select the corresponding email receiver from the drop-down list.

Subject: Enter the subject of the email template.

Status: Toggle to enable the status of the email template. But, if the status of the email template is disabled, then the default email template which comes with the software is used for the email notification.

Macro: This field displays the corresponding database fields based on the selected receiver type. Users can drag the required fields that need to be displayed on the email.

Template: Draft the required content of the email template.

Once provided with all the details, click **Confirm** to save and update the created Email Template.

11.6.3 Alert Settings

On the **System** module, click **[Configuration]** > **[Alert Settings]** to configure the alerts for the events.

Users can enable or disable the corresponding events for Email, App, WhatsAPP and SMS alerts.

Click Save to save the settings.

Click Test to test the connection between twilio and ZKBio Time 8.0.

Click **Clear** to clear the settings.

11.6.7 FTP Settings

1. Add FTP Server

Select [System] > [Configuration] > [FTP Settings] > [Add].

Host Address*:			
Port Number*:	21		
Is SFTP*:	Yes	~	
Username*:			
Password:			
SSH Key:			

Host Address: Enter the FTP Server address.

Port Number: Enter the FTP server port number.

Is SFTP: Check whether the server is a FTP server or a SFTP server.

Username: Enter FTP Server's Username.

Password: Enter the FTP server's Password.

SSH Key: Enter the SSH key for the connection when it is a SFTP server.

The FTP Settings can be used to transfer the files exported by the software to the specified FTP server for data transfer.

∕≪Note:

Click the FTP server or the *in the same row of the FTP server*.

2. Delete FTP Server

In the FTP list, select the FTP server and click **[Delete]** at the top of the FTP server list, or click in the same row of the FTP server.

Click [Confirm] to delete the selected FTP server.

11.6.8 Bookmarks

1. Add a Bookmark

You can save the filtered query as a bookmark to simplify the search operation next time. See <u>11.</u> <u>"Custom bookmark"</u> in **Appendix 1** for a custom bookmark.

After saving successfully, you can view the saved filter under the bookmarks list.

- A. Login Setup
 - 1. Single Login

If it is enabled, then the software will forbid system users to login the software from multiple places.

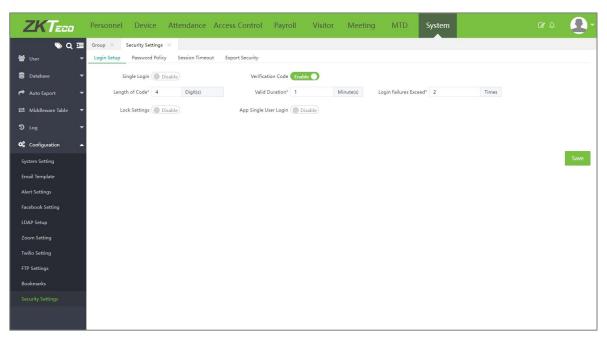

When the system administrator login the software on computer A, and then login on computer B, the following prompt will appear on computer A and jump back to the login interface.

This feature is only for system administrator login. For self-service, multiple logins is not allowed by default.

2. Verification Code

If it is enabled, users must enter the QR code while logging into the software. Users can set the length and validity period of the verification code here.

I ZKBio Time
Admin Login Self-Service [] 교육
Password Verification Code
Remember Me Forget Password
Login Fingerprint Exception Copyright 2022 ZKTECO CO.,LTD AIrights reserved. Data Processing Agreement Personal Information Protection and Privacy Policy.

3. Lock Setting

If it is enabled, if the user enters login password incorrectly equal to the set login failed times within 24 hours, the system will lock the user and prohibit the user from login. After the set lock duration, the user can login again.

Example: Set the Failed Login as 3 times, and Lock Duration as 5 minutes.

• While the user inputs wrong password, there will be a prompt as following picture:

TKBi	o Time
Admini Login Self-Service	ide Krinker
Login ZCK	Fingerprint Fingerprint Fingerprint Fingerprint Fingerprint Fingerprint Fingerprint

• When the user enters login password incorrectly equal to 3 times within 24 hours, there will be a prompt as following picture. The software will lock the user.

	⑦ZKBio	Time
	Admin Login Self-Service - Indext & soci for law vision of 2211022110351 Common Password Vogin	9
Copyright B0221	ZXTEED CO.LTD. AI rights reserved. About Except Parameter Encloses Aboutenees	

• After 60 minutes, the user can enter username and password to try to login the software again.

APP Single User Login

Toggle to enable APP Single User Login, and only one APP account will be allowed to log in to the APP within one day with the same mobile phone. This function facilitates added security by preventing the employee from making attendance punch on APP for the other employee.

11:07 -	ali≎∎
	:0
Username	
Password	
Remember Me	
Login	
Eorgot Password?	Ş
Serv	er Configuration →

As displayed in the above image, when this function is enabled, only one employee can log in to the APP on one phone, while the other employee tries to login the APP with the same phone, then there will be a prompt to limit the login.

- B. Password Policy
 - 1. Password Strength

Here are three kinds of password strength:

Lower: Password must be 8 to 16 characters.

Medium: Password must be 8 to 16 characters and contains at least 2 of the following types: numbers, letters, and special characters.

Higher: Password must be 8 to 16-digit combinations of numbers, letters, and special characters. It is recommended to set as Medium or Higher to ensure the software security.

2. User must change password at first login

If it is enabled, then when the system users or employee login the software for the first time, it is required to change the password and login the software with the new password.

3. Enforce Password Expiration

Users can set the expiration days for the password. And if the password is expired, then the users need to change the password at first and use the new password to login to the software.

Login Setup	Password Policy	Session Timeout	Export Security
	User must chan	ge the password at fir	rst login

C. Session Timeout

This function facilitates setting the period for the session timeout.

And the time the user does not operate the software exceeds the defined time, then the software will automatically log out to ensure data security.

Login Setup	Password	Policy	Session Timeout	Export Security
Session	Timeout	60	Minute(s)	

D. Export Security

Login Setup	Password Policy	Session Timeout	Export Security		
Export	Encryption 🔘 Disal	ble		Password	

Enable **Export encryption** function and set the export encryption password and then the user needs to enter the set password to open the file exported from the software.

E. Forget Password

While forgetting login password, users and personnel can click [Forget Password] on login page to get new password.

Enter username and email address set in the software:

[†]ZKBio Time
Password Management > Forget Password User Employee Username
Email
Submit

The email of resetting password will be sent to corresponding email account.

Reset Password	
If you have not submitted an application to forget your password, please ignore this email and your password will not be changed. The link below is valid for 2 hours. Reset Password	

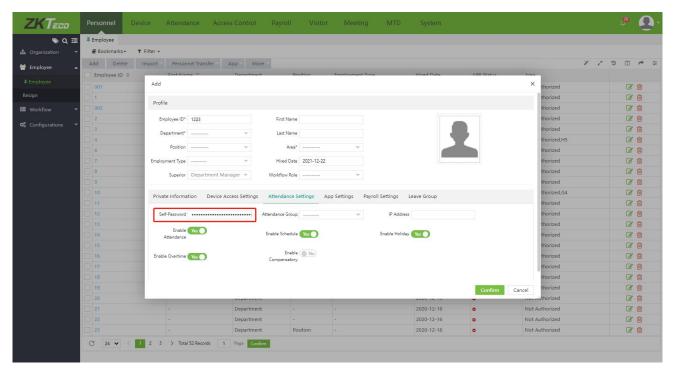

Users need to click the link in the email within 2 hours to get the new password.

<u>Appendices</u>

Appendix: 1

1. Employee Self-Service Login Password Setting

Click Employee - > Employee - > Add / Edit - > Attendance Settings - > Self-Password to set the employee's self-service login password.

2. Personnel Selection

An example to adjust an employee to an area is shown below:

Select [Personnel] > [Organization] > [Area] > [Personnel Transfer].

De	partme 💌	Department	- 0	Employee	Sel	ected 2				
	Employee ID	First Name	Last Name	Department		Employee ID 👙	First Name 💠	Last Name 👙	Department	
	1	nora&		Department		10	Nicole Test		Nicole Test	
	10	Nicole Test D		Nicole Test		100001	100001		2	
	100001	100001		2						
	100002	100002		2						
	100003			XXX						
	100004	100004		2						
	100005	100005		2						
	100006	100006		2						
	100007	100007		2						
)	▼ Total 185	Records 🤇 🔅	> 1	Page Confirm						

You can search for employees in two ways:

1) **Search By Department:** Click the Department search box to search the corresponding Department. Click the Master to view all the employees in all the Departments. If only one of the departments is selected, all the employees in that Department will be displayed.

2	h Q .
>	Department (
>	C ZKTeco (0/2)
	C errq
	Testing
	D2000
	D2001
	D2002
	D2003
	D2004
	D2005
	D2006
	D2007

2) **Search By ID/Name:** Enter the Employee ID or Name to be searched in the text box and click to make precise search, click again to make random search. Then the related employee details will be displayed.

If the required employee is displayed in the Selected employee's list and you need to delete one or more employees, deselect the checkboxes.

3. Date Selection

An example to select the date is shown below:

The system automatically displays the date selection window when you click the Date textbox as shown in the figure below.

Departm	ne 📼	0	Departi	ment		v	Q	Emplo	oyee		Sele	cted 0			
Empl	oye	Firs	t Nam	ne		Last N	ame		Depa	rtment		Employe	First Name 💠	Last Name	4
0000 0000 0000 0000 0000 0000 0000 0010 0012 1 1 1000 10000	010. 052. 056. 567. 567. 567. 345.		 Mo 28 4 11 18 25 2)19	Nov Th 31 7 14 21	> Fr 1 8 15 22 29 6		FC echr OW	nical SSIL(arka nical SSIL(arka arka arka arka			None		
	otal ate*	2019 Quit	-11-04	Cle	ar	Now]	nfirm Attenda	С	onfirm					

- 1) Click the year on the top and select a year from the year list (by default, the system displays the current year).
- 2) Click the month and select a month from the month list (by default, the system displays the current month).
- 3) Select the required date in the date selection box.
- 4) Click **Confirm**. The selected date is displayed to the right of Resignation Date, as shown in the figure below.

2019-02-20	
	2019-02-20

Now: Click Now to set the current date.

Clear: Click Clear to clear the selected date if you want to re-select the date.

4. Time Selection

An example to add a normal timetable is shown below:

• The system automatically displays the time selection window when you click the Time textbox as shown in the figure below.

Na	ame*		Work He	ours Assign To* Regular				
Basic Setting	BreakTime Setti	ng Unsched	uled Time Setting	Overtime Rule Rule	Setting			
Check-In	* 09:00:00			Check-Out*	18:00:00	Cross	0 -	Days
Check-In Start	08:00;00	Cross 0	✓ Days	Check-Out Start*	17:00:00	Cross	0 -	Days
Check-In End	1×	Select Time		Check-Out End*	19:00:00	Cross	0 -	Days
WorkDay	Hour	Minute	Second

	09	03	03					
	10	04	04				Confi	m Cancel
	11	05	05			_		Caricer
		Clear Nov	w Confirm					

- Click the hour's box. Select the "hour" by scrolling up and down in the corresponding "hour" selection box.
- Click the minute's box. Select the "minute" by scrolling up and down in the corresponding "minute" selection box.
- Click the second's box. Select the "seconds" by scrolling up and down in the corresponding "second" selection box.
- After setting the hour, minute and second, click [Confirm] to save the time.

Now: Click [Now] to set the time to the current time.

Clear: Click [Clear] to clear the selected time if you want to re-select the time.

5. Import

An example to import an employee is shown below:

I. Select [Personnel] > [Employee] > [Import] > [Import Employee].

Import Em	ployee						×
	Import File* nplate Fileds		osen T	Language* User Defined Template	English	×	
Field	Employee	ID					
Description 1.The he 2.The En 3. All col 4.The Ca	nployee ID is I umn values s	mplate are required Required fields hould be text format nust be unique		Overwrite Existing (No		
						Confirm	Cancel

∕∞Note:

Click **[Download Template]** to download the template. Fill the template and save the corresponding employee's information. You can use the employee import function to import the file (.xls file) to the system.

II. Click [Choose File]. A dialog box will open as shown in the figure below.

III. Select the file to be imported and click [Open] or directly double-click the file to be imported. After file selection, the address of the selected file is displayed next to Choose File, as shown in the figure below.

∕≪Note:

Only .xls and .csv files can be imported.

- IV. Language: Select the language of the imported details.
- V. **Template Fields:** Users can select the corresponding fields to get imported. The downloaded template will include the custom fields.
- VI. **User Defined Template**: While it is enabled, then the column field that is located can be edited. And user do not need to download the template and fill in the employee data with the template format. The software will recognize the fields in the imported file according to the set column.

Import Em	ployee				×
	Import File* (Choose File N	o file chosen	Language* English 👻	
Ten	n <mark>pla</mark> te F <mark>il</mark> eds	Employee II) × Firs	User Defined Template Yes	
Field	Employee	ID First Name	Last Name	.ocal Name	
Column	1	2	3	4	
Star Description	t From Row*	2		Overwrite Existing	
1.The he 2.The Em 3. All col	ployee ID, Firs	ould be text for	nent Number	Required fields	
				Confirm	Cancel

- VII. Start From Row: Set the row that the software starts to import.
- VIII. **Overwrite Existing:** When **[Ignore]** is selected, records with the identical Employee ID are not imported. When **[Overwrite]** is selected, records with the identical Employee ID replace the earlier records.
- IX. Click [Confirm] to import the records.

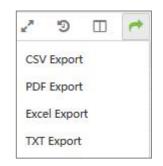

- a) A table header is required for importing the templates.
- b)Employee ID is mandatory. Other fields are optional.
- c) The card number must be unique.
- d)All the values should be in text format.

6. Export

An example to export employee's list is shown below:

✓ Select [Personnel] > [Employee] and click [™] on the top right corner of the screen. The

exporting options are shown below:

✓ File Type: if you want to export the file in Excel format, select Excel Export.

×

Select "Current Page" to export the data for the current page.

Select "All Data" to export all the data.

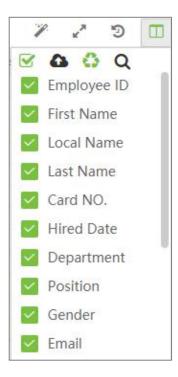

✓ Click [Confirm] to set the export path. Under the corresponding path, the file will be successfully exported, as shown in the figure below:

Employee_2019-11-04-15-03-38_export.xlsx

7. Custom Display Fields

Take the Employee's list as an example:

Select [**Personnel**] > [**Employee**] and click \square on the top right corner of the screen then the field selection window will pop-up as shown below:

You can adjust the display order and decide whether the fields need to be displayed or not (checked means it will be displayed, un-checked means it will not be displayed). When adjusting the order, simply move the cursor to the field to be moved, and then drag the field to move the order when the

appears after the field. After adjusting the order, click **Confirm** to reorder the fields.

8. Adaptive Column Width

The column width can be set to the optimal width.

After setting the number of fields to be displayed, click *main* and choose [Best Fit] to adjust the column width, as shown in the figure below:

9. Multi-Label Function

You can navigate to any module by clicking the opened labels. There is no need to go back or refresh the page. With this multi-label function, the data loss can be prevented even if navigating to other pages.

Take the Personnel module as an example:

a) Click **[Personnel]** to open the Personnel module. When you open any menu, you can see the opened menu label at the top of the page, as shown in the below image:

ZKTeco	Personnel	Device Attendance	Access Contro	ol P	ayroll Visito	or Meet	ing M	TD System		6	049	Ō

	821015	CHANG JUNE FEI	Production		-	2021-05-26	•	Not Authorized, Ihl-revf	G	8 🛍		

b) The menu can be switched randomly. When switching, the data which is entered will not be refreshed.

10. Custom Theme

You can change the theme color and background pattern.

Click at the top right of the page and select Theme to set the theme color.

hemes Pure Color		100
blue_linear	green_linear	bg_1.png
bg_10.png	bg_2.png	bg_3.png

Click **[Themes]** to select the background of the menu. Then click **[Pure Colors]** to customize the theme color. Then click **Change** to apply the color effects.

11. Filter Search Function

You can filter and search all the results in this software.

Take the Employee list as an example. Click [Personnel] > [Employee] > [Employee] to view the Employee's list.

🏷 Q 🗉	Department × Er	mployee ×

∕≪Notes:

The filter function under each menu in the system is basically similar. But the difference lies in the field settings.

12. Custom Bookmark

You can customize a variety of filter combinations and save them as bookmarks. By the next time, you can open the existing bookmarks to filter the data.

When multiple filters are set, the page will be displayed as shown below:

END-USER LICENSE AGREEMENT

Important Information – Please read carefully

This End-User License Agreement ("EULA") is a legal agreement between ZKTeco and you (either an individual or a company) The Software product includes the Software application, associated media, printed materials, and "online" or electronic documentation. By installing, copying, or using the Software Product, you agree to accept the terms of this EULA. If you do not agree to the terms of this EULA, do not install, or use the Software Product.

SOFTWARE PRODUCT LICENSE

The Software Product is protected by copyright laws and international copyright agreements, as well as other intellectual property laws and agreements. The Software Product is licensed, and it cannot be sold by any third party.

1. GRANT OF LICENSE. This EULA grants you the following rights:

Installation and Use. You may install the Software Product in an unlimited number of systems.

Replication and Distribution. You may distribute the software product to an unlimited number of systems; provided that each copy shall be a true and complete copy, including all copyright and trade notices, and shall be accompanied by a copy of this EULA. The Software Product may be distributed as a standalone product or included with your own product.

2. DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS.

Limitations on Reverse Engineering, Recompilation, and Disassembly. You may not destruct, decompile, or disassemble the Software Product only to the extent that such activity is expressly permitted by applicable law and notwithstanding this limitation.

Separation of Components.

The Software Product is licensed as a single product. Its components may not be separated for use on more than one system.

Software Transfer.

You may permanently transfer all of your rights, provided the recipient agrees to the terms of this EULA.

Termination.

Without prejudice to any other rights, ZKTeco may terminate this EULA if you fail to comply with the terms and conditions of this EULA. In such a case, you must destroy all copies of the Software Product and all of its components.

Distribution.

The Software Product may not be sold or included in a product or package, which intends to receive benefits from the inclusion of the Software Product. The Software Product may be included in any free or non-profit packages or products.

3. COPYRIGHT.

All copyrights of the Software Product (including but not limited to images, photographs, animations, video, audio, music, text, and "applets" incorporated into the Software Product), the accompanying printed materials, and any copies of the Software Product are owned by ZKTeco. The Software Product is protected by copyright laws and international treaty provisions. Therefore, you must treat the Software Product like any other copyrighted material except that you may install the Software Product on a single computer, and you can keep the original solely for backup or archival purposes.

LIMITED WARRANTY

NO WARRANTIES.

ZKTeco expressly disclaims any warranty for the Software Product. The Software Product and any related documentation being provided "as is" without warranty of any kind, either express or implied, including, without limitation, the implied warranties of merchantability, fitness for a particular purpose, or no infringement. The entire risk arising out of usage or performance of the Software Product remains with you.

NO LIABILITY FOR DAMAGES.

In no event ZKTeco will be liable for any damages (including but not limited to damages, loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the using this product or inability to use this product, even if ZKTeco has advised of the possibility of such damages.

Acknowledgment of Agreement.

I have carefully read and understood this Agreement, ZKTeco CO., LTD.'s Privacy Policy Statement.

If YOU ACCEPT the terms of this Agreement:

I acknowledge and understand that by accepting this agreement, I have to abide by the terms and conditions to use the Software Product to ensure smooth function. I also acknowledge that ZKTeco can terminate the License Agreement if I do not comply with the terms and conditions.

IF YOU DO NOT ACCEPT the terms of this Agreement.

I acknowledge and understand that by refusing to accept these terms, I have rejected this license agreement and therefore have no legal right to install, use, or copy this Product or the Licensed Software that it incorporates.

Glossary

<u>Absence</u>

Based on the Attendance parameters, if there is no Check-in or Check-out in attendance statistics, it will be counted as absence. Or Late arrival/Early leaving for more than N minutes will be counted as absence.

Actual Attendance Time

It refers to the actual working time of an employee. It is calculated based on the Check-in/out time statistics of the employee. The default unit is workday. The statistical rule can be changed in [Attendance] > [Calculation Item] > [Expected/Actual].

Attendance Duration (Time)

It refers to the time span between the actual check-in time and the actual check-out time.

Attendance Status

It refers to the attendance punch category. By default, the system has the following statuses: Check-in, Check-out, OT-in, OT-out, Break Time-out and Break Time-in.

Attendance Timetable

It refers to the timetable which is used to set the attendance parameters. It includes the configuration of parameters such as Start/End time of the work, permissible late arrival/early leaving time range, whether Check-in/out is mandatory, permissible Check-in/out time range, Break time, and Overtime. This is the minimum unit of attendance time settings.

Auto Overtime

When the Check-out time is greater than the actual work end time, this parameter determines whether the extra worked time is to be counted as overtime or not.

Correction of Status

The employee can change the attendance status in the device according to the shift timetable and attendance time. The attendance will be calculated based on the status.

Attendance Time

It refers to the total duration of the employee's actual work. The default unit is workday. The statistical rule can be changed in [Attendance] > [Calculation Item] > [Expected/Actual]. Specifically, the value is calculated based on the unit (workday, hour, and minute) as well as the counted workdays and minutes in the shift timetable.

Check-in/Check-out

Check-in/Check-out decides whether the employee has to Check-in/Check-out compulsorily or not. If this is enabled, then Check-in/Check-out is mandatory otherwise Check-in/Check-out is optional.

Early Leaving

Early leaving includes the time setting for the corresponding timetable. It also decides whether the actual check-out time is earlier than the check-out time in the timetable. On the other hand, if the mandatory Check-out in the timetable is set to Yes, and the employee leaves early without Check-out is counted as Early Leaving by N minutes.

Exception

It refers to the leave time in any timetable.

Flexible Shift

It refers to a default attendance shift set in the system. It is a cycle of flexible timetables within a week. When an employee works in a flexible schedule and attendance verification is required, a flexible shift can be assigned to the employee. When a shift is not assigned to an employee, the attendance is calculated based on the flexible shift and it can be considered as overtime on a day off or on holidays. The flexible shift is applicable to Business owners, Business Personnel, Service staff, and order-oriented production department employees.

Late Arrival

Late arrival includes the time settings for the corresponding timetable. It also decides whether the actual check-in time is later than the check-in time in the timetable. On the other hand, if "Must Check-in" in the timetable is enabled and the attendance parameter is set to "count as late by 60 Minutes" if there is no check-in, the actual time without check-in is counted as late arrival by N minutes. The time of late arrival does not affect the work minutes for the attendance calculation.

Must Check-in/Check-out

In some companies, only check-in or check-out is required. If check-in or check-out is mandatory, the corresponding details are included in the attendance statistics.

No Check-in/No Check-out

No Check-in/No Check-out refers that there is no actual attendance punch in the selected timetable.

Permissible Late Arrival/Early Leaving

It refers to the permissible time range for late arrival/early going before/after the actual work time ends/starts.

<u>Role</u>

While using the system, a Superuser needs to assign different levels to new users. To avoid assigning one by one, the Superuser can set the roles with specific levels of management. The Superuser can also assign appropriate roles to users while adding them.

<u>Schedule</u>

It refers to the time plan that will be used in the timetable for calculating employee's attendance. It is the key element in calculating the attendance results.

<u>Shift</u>

It refers to a rearrangement plan for the employee's working hours. It is composed of one or more attendance timetables based on a certain order and cycle period. To calculate attendance, the shift must be assigned initially to an employee.

Start/End Check-in

It refers to a timetable that has a valid range of check-in. The check-in records out of this range are invalid.

Start/End Check-out

It refers to a timetable that has a valid range of check-out. The check-out records out of this range are invalid. The check-out start time cannot overlap the check-in end time.

<u>Superuser</u>

It refers to a user with all operational permissions of the system. A superuser is able to assign new users (such as Company Management Personnel, Registrars or Attendance Administrators) and configure the corresponding user roles to different levels of management.

Temporary Schedule

Temporary schedules are used if there is a necessity to adjust the work time of employees due to temporary changes in employees' work time. The temporary schedule can be appended to the employee's current shift (The attendance report contains two schedules). This schedule is applicable to employees who work without any fixed schedule.

Time in a Timetable

It refers to the total work time in an attendance timetable in the shift of a particular day.

<u>Unit/Minimum Unit</u>

The unit may be a day/hour/minute. The minimum unit is a numeric value. The combination of these two is used to set the minimum unit for attendance statistics. E.g: One day, One hour or One minute. For example, the minimum unit of leave is set to one hour. When rounding-off is enabled, 1.5 hours will be counted as two hours and 1.4 hours will be counted as one hour.

Work Minute

In normal attendance, the work minute is the time set in Work Minute of a shifting timetable. When the valid attendance duration in the timetable is smaller than the actual time which is set in Work Minute of the timetable, the attendance duration is valid. The work minute in a flexible shift is 0.

Work time

It refers to the time interval between an employee's work start and end time (minutes). The value may not be equal to the actual interval between punching in and out. The value may be larger or smaller than this interval, depending on the Company's regulations. Normally, this value can be neither larger than 480 nor smaller than 0. If the value is 0, the timetable will be considered overtime and it will not be counted as work time.
